“We Invite Your Success”

GRADUATION PROGRAM

Students are required to complete a minimum of 80 credits in grades 10-12 to fulfill the graduation requirements.

52 Required Credits:

- a Language Arts 10 (two 2 credit courses)
- a Language Arts 11 (4 credits)
- English Studies 12 (4 credits)
- Social Studies 10 (4 credits)
- a Social Studies 11 or 12 (4 credits)
- Science 10 (4 credits)
- a Science 11 or 12 (4 credits)
- a Mathematics 10 (4 credits)
- a Mathematics 11 or 12 (4 credits)
- Physical and Health Education 10 (4 credits)
- a Fine Arts or Applied Skills course (4 credits)
- Career-Life Education (4 credits)
- Career-Life Connections (4 credits)

28 Required Elective Credits:

Students must complete a minimum of 28 elective credits.
12 of these elective credits must be at the grade 12 level.

3 Provincial Assessments:

Prior to Graduation, all students must write a Numeracy 10 assessment; a Literacy 10 assessment; and a Literacy 12 assessment.

4 Credits of Indigenous Focused Course Work:

These credits can also count for other graduation requirements. At SSS we offer 6 options for students to choose from: BC First Peoples 12, Contemporary Indigenous Studies 12, English First Peoples 10, 11 and 12, Halq'eméylem 11

PROVINCIAL ASSESSMENTS

Each student has up to three opportunities to write each assessment. The highest mark achieved will be recorded on the student's final transcript in grade 12.

COURSE PLANNING

This Course Calendar outlines all courses offered at SSS. Students are to study this booklet (on-line or paper) and discuss their potential course selections with their teachers, counsellors and parents. **All students must complete a course selection form with final selections. Students are urged to check Post-Secondary Entrance requirements when selecting courses.**

This selection phase is of utmost importance as the tallies gathered from the students' choices determine the classes offered for the next year. Every effort is made to enable students to get their chosen courses. However, due to timetable constraints, sometimes alternate course selections are used.

COUNSELLING SERVICES

Counsellors are available on an appointment basis. Students are assigned to counsellors alphabetically by last name. Please email your counsellor to set up an appointment. Students who are planning on enrolling at a post-secondary institution must check their entrance requirements. Universities have different requirements, so please be careful to check the institution you want to attend. If you are unsure of requirements to fulfill your plans, please talk to a counsellor or career advisor.

A-G	Dave Shepherd	david_shepherd@sd33.bc.ca
H-O	Elaine Reitsma	elaine_reitsma@sd33.bc.ca
P-Z	Jenna Clayton	jenna_clayton@sd33.bc.ca

CAREER CENTRE

The Career Centre is located in room C125 and is a valuable source of career and post-secondary information for all students. It is a centre where students, parents, and teachers can access post-secondary, scholarship, work experience, volunteer placements and other sources of career-related planning information.

POST SECONDARY PLANNING:

Our Career Advisor, Mrs. Christensen, is available to help with post-secondary planning; you can drop in with a question or email for an appointment.

Up to date scholarship information, can be found on the Sardis Secondary website under the student information tab. (<https://sardissecondary.sd33.bc.ca/scholarships-and-post-secondary-planning>)

Lori Christensen lori_christensen@sd33.bc.ca

WORK EXPERIENCE:

Work experience allows students to connect what they learn in the classroom with the skills and knowledge needed in the workplace and society. Students can use Work Experience to explore careers, to earn credits toward graduation, and to apply for community bursaries and scholarships. Work Experience also helps young people build a strong network of community contacts and references. 30 hours of work experience is also needed for graduation.

See page 70 of this course calendar for more information.

WEX Teacher:	Lynnette Van Winkle	lynnette_vanwinkle@sd33.bc.ca

CAREER LIFE – 8 credits required for graduation

Career Life Education (CLE) and Career Life Connections (CLC-12A and 12B) are required courses under the Graduation Program. At Sardis Secondary we split these courses up over grades 10-12. In grade 10, students will be pulled from a number of classes throughout the year in order to complete CLC 12A (2 credits). In grade 11, students are required to take Career Life 11 (4 CLE credits) as one of their selected courses. In grade 12, students will complete the final component of Career Life (CLC 12B) for the final 2 credits. Students do not need to select this course as it will be automatically added as an additional course to your schedule in September of your graduating year. This final course is designed to assist students in exploring their future career possibilities. Topics covered include career planning, networking career relationships, creating balance between career and personal well-being, and fostering a desire for life-long learning. As part of this course, students will be required to demonstrate their personal learning through a capstone project which will be presented to a staff member.

FLEX 10/11/12

Flex is a 2-credit course that occurs on Thursdays throughout the school year. Each week students select a session from those offered by the teachers. The sessions are designed to enhance, enrich, and extend student learning opportunities on a variety of topics. Students do not select this block with their other course selections. In September, Flex will be added to each student's timetable according to the grade they are in.

EXTERNAL COURSE CREDITS

Students can earn credit for accomplishments outside the regular classroom setting. Examples: Young Drivers Certificate, Bronze Cross, Royal Conservatory of Music, BC Rep Sports Teams. For a full list of creditable activities and the specific requirements necessary, please refer to the Ministry website at:

http://www.bced.gov.bc.ca/graduation/ext_credentials/ext_cred.php

SPECIALTY PROGRAMS

ADVANCED PLACEMENT COURSES

AP courses are usually taken in Grade 12 and are taken either concurrently with the grade 12 level Ministry course, in a 'combo' format, or following completion of the grade 12 level Ministry course. Students have the option to write the AP examination in May at a cost of \$135. The courses are 1st year university level in content. **Reasons to take AP:**

- They are challenging and provide enrichment to the regular program.
- Since they conform to international standards, some post-secondary institutions prefer their applicants to take AP courses.
- Because they are 1st year university level courses, students completing them find the transition to first year post-secondary workload easier.

Note: since AP courses require considerable extra effort, they should only be taken by those who have a keen interest in, and ability for, the subject.

For more information, see your school counsellor or current teachers. AP courses are offered for **Biology, Calculus AB, Chemistry, Music Theory, English Literature & Composition and Psychology.**

HOCKEY ACADEMY

Hockey skills development program is for students who have a passion for hockey. This linear, year-long program is open to male and female students of any skill level who want to improve their hockey skills for either recreational or competitive goals. Students will participate in three on-ice and two off-ice development sessions per week from September – June.

Skill development and hockey specific training (on and off ice) include: individual (stick, possession, passing, power skating, shooting, checking) and team (play, transition, special teams) hockey offensive and defensive skill, agility, balance, cardio, muscular strength and endurance, nutrition, and leadership. Academic support and learning style assessment are also components of the program, as is viable post-secondary planning, including NCAA Division I & II, CIS and Canadian College levels.

Application for download at www.sardissecondary.ca. **There is a mandatory, on-ice skill assessment for all applicants prior to acceptance. In addition, all applicants must be currently active at a minimum of CHWK Minor Hockey House level.**

PHE 10 and/or CLE 10 course requirements may be met within the program. Students will demonstrate athletic, academic and personal growth each year.

TRAIN IN TRADES AUTOMOTIVE PROGRAM

- **Speak with Mr. Goodman and/or your counsellor for more information**
- **See p. 62 for a program description**

TRAIN IN TRADES WELDING PROGRAM

- **Speak with Mr. Jones and/or your counsellor for more information**
- **See p.66 for a program description**

COURSE DESCRIPTIONS

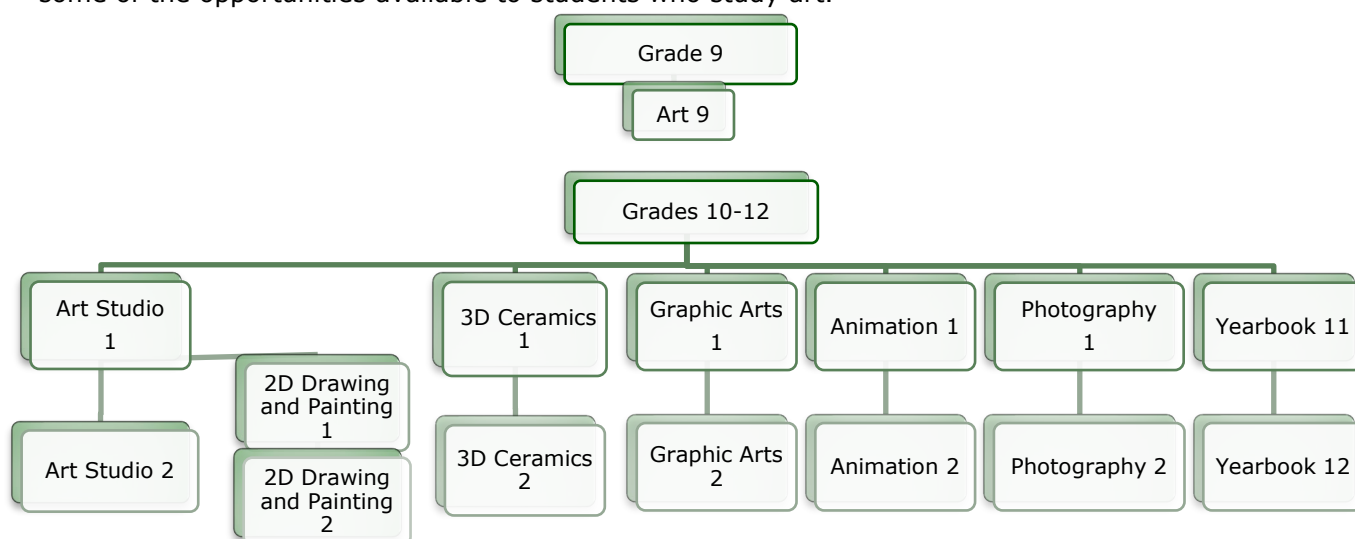

ART (AR)

GENERAL INFORMATION ABOUT THE VISUAL ARTS PROGRAM

The aim of the Visual Arts Program is to allow learners to experience the power, ideas, and emotions expressed in visual artwork by enabling them to perceive, react, create, and communicate visually. The Visual Arts Program offers a series of courses in both 2-dimensional and 3-dimensional media. Students may choose a specialization or a combination of courses to meet provincial credit requirements and electives. Within a specialization, courses are sequential & require the prerequisite noted. In all courses, evaluation for project-based assignments will reflect the level of effectiveness and competencies of students.

The Visual Arts Program will enrich students' understanding and appreciation of Art. For committed students, the art courses will prepare students for post-secondary studies. Careers in fine art, graphic design, animation, industrial design, interior design, or in the movie or game industries represent some of the opportunities available to students who study art.

AR-VISUAL ARTS 9

Prerequisite: Open to students in Grade 9.

Designed to allow students to explore a variety of art methods, this course provides a good foundation for students planning to take further visual arts courses.

Students will explore their visual creativity through drawing, painting, printmaking, graphics, photography, sculpture, and ceramics

AR-ANIMATION 1

Prerequisite: Open to students in Grades 10-12

Offered to meet the growing demand for animators from industries such as movie and television, computer, and video game design. This course content will include an introduction to storyboarding, background design, and 3D modeling.

Two industry-standard software will be used for the completion of this course. The 2D unit will be completed using Adobe Animate. The 3D unit will be done using Blender

AR-ANIMATION 2

Prerequisite: Animation Level 1

Adobe Animate and Blender programs will be used for more in-depth projects.

Students will be focusing on 3D character design including modeling and rigging, as well as animating it.

Independent work is encouraged at a more advanced level.

This is a good choice for student's interested pursuing animation at a post-secondary level.

AR-ART STUDIO 1

Prerequisite: Open to students in Grades 10-12

Explore a variety of art methods while learning about the elements and principles of art and design.

Use a variety of materials, strategies, techniques, and technologies that support creative processes.

Explore your creativity through drawing, painting, printmaking, sculpture, photography, and ceramics.

AR-ART STUDIO 2

Prerequisite: Art Studio Level 1

Explore a variety of art methods while learning about the elements and principles of art and design.

Continue to explore a variety of art methods such as: drawing, painting, printmaking, sculpture, photography, and ceramics.

Independent work is encouraged at a more advanced level.

AR-3D-CERAMICS 1

Prerequisite: Open to students in Grades 10-12

Designed to allow students to specialize in three-dimensional art forms.

This course focuses on 3D ceramic sculpture, pottery – wheel throwing, hand building, sculptural forms using a variety of clay bodies, glazes, and surface techniques.

AR-3D-CERAMICS 2

Prerequisite: Ceramics Level 1

Designed to allow students to continue to specialize in three-dimensional art forms.

This course builds upon and expands further on 3D ceramic sculpture, pottery – wheel throwing, hand building, sculptural forms using a variety of clay bodies, glazes, and surface techniques.

Independent work is encouraged at a more advanced level.

AR-2D-DRAWING & PAINTING 1

Prerequisites: Art Studio Level 1

Create personally meaningful images through drawing and painting.

Explore a variety of sources, techniques, and strategies for image development and design.

Apply visual elements and principles of design to your artwork.

Explore graphite, charcoal, pastel, pencil crayon, pen and ink, acrylic paint, and water colour techniques.

Evaluation: in class assignments, projects, sketchbook, and written self-evaluation.

AR-2D DRAWING & PAINTING 2

Prerequisites: Drawing & Painting Level 1

Students will build on media techniques from Drawing & Painting Level 1 using graphite, charcoal, pastel, pencil crayon, pen and ink, acrylic paint, and water colour.

Students will be encouraged to use critical thinking and problem-solving techniques in their artwork.

Evaluation: in class assignments, projects, sketchbook, and written self-evaluation.

AR-GRAPHIC ARTS 1

Prerequisite: Open to students in Grades 10-12. Some computer and art/sketching skills are helpful, but not necessary.

Explore and master tools used in vector drawing (Adobe Illustrator) and photo editing (Adobe Photoshop) as well as become familiar with general design concepts.

Produce commercial works for various school and community publications.

Evaluation will be based on assignments and projects.

AR-GRAPHIC ARTS 2

Prerequisite: Graphic Arts Level 1

Use the tools mastered in Graphic Arts 1 (vector drawing and photo editing) as well as general design concepts to work on projects that are more technically and conceptually advanced.

Produce commercial works for various school and community publications.

Independent work is encouraged at a more advanced level.

Evaluation will be project based and will require the student to keep a portfolio of the work they have done.

AR-PHOTOGRAPHY 1

Prerequisite: Open to students in Grades 10-12.

Explore a variety of photography techniques that include: digital photography, black and white darkroom photography, historical process photography (cyanotypes and gum prints), and screen printing. Become familiar with the basics of Photoshop.

Develop personally meaningful images while mastering the processes of each photo/printing technique.

Outcomes: art/photo prints, cards and posters and the opportunity to print designs on t-shirts or other textile items.

AR-PHOTOGRAPHY 2

Prerequisite: Photography Level 1

Continue to explore a variety of photography techniques that include: digital photography, black and white darkroom photography, historical process photography (cyanotypes and gum prints), and screen printing.

Student will work on projects that are more advanced conceptually, as well as technically.

AR-YEARBOOK 11

Prerequisite: C+ average or better overall and teacher approval

For students who have an interest in photography resulting in professional production of the school's yearbook.

Includes a variety of experiences in writing, digital photography, and desktop publishing.

The production of the yearbook encourages critical thinking and problem solving and requires students to be willing to meet strict deadlines. This course is useful for students interested in careers in business or art as creativity and technology are applicable to both fields. Current software programs used are Adobe InDesign and Adobe Photoshop.

A great practical application course for students who want experience working with professional photography and publishing technology.

Evaluation: in class assignments that apply to design theory and technology; assigned pages, photography, and page caption composition

AR-YEARBOOK 12*

Prerequisites: Yearbook 11 - *Teacher approval required.

Includes a variety of experiences in writing, digital photography, and desktop publishing.

The production of the yearbook encourages critical thinking and problem solving and requires students to be willing to meet strict deadlines. This course is useful for students interested in careers in business or art as creativity and technology are applicable to both fields. Current software programs used are Adobe InDesign and Adobe Photoshop.

A great practical application course for students who want experience working with professional photography and publishing technology.

Evaluation: in class assignments that apply to design theory and technology; assigned pages, photography, and page caption composition.

For students who have an interest in photography resulting in professional production of the school's yearbook.

BUSINESS AND COMPUTERS (BU)

BU-ACCOUNTING 11

Prerequisite: None. Open to Grade 10 – 12 students.

Introductory course, covering debit and credit theory, GST and PST, the accounting cycle, journal entries, ledgers.

Analyzing and interpreting financial statements and introduction to Simply Accounting Software.

Evaluation on tests, quizzes, and daily work.

BU-ACCOUNTING 12

Prerequisite: Accounting 11

Enables students to use Simply Accounting to input, analyze, and report the finances of business. Usage of General Ledger, Accounts Payable, Accounts Receivable, Payroll, Inventory, and Job Cost Modules.

Evaluation on projects, daily work, and tests.

BU-BUSINESS COMPUTER APPLICATIONS 11

Prerequisite: None. Open to Grade 9-12 students.

Learn at your own pace, self-directed with multi-media lessons.

Learn Microsoft Word (intro): letters, mail merges, labels, tables, reports, resumes.

Learn Microsoft PowerPoint presentations (advanced): master pages, charts, kiosks, create professional presentations.

Learn Microsoft Excel (intro): spreadsheets used in business, banking, finance, real estate, etc.

BU-BUSINESS COMPUTER APPLICATIONS 12

Prerequisite: None. Open to Grade 10-12 students.

- Optional: Get your "Microsoft Office Specialist Certification" (Sardis is an official testing centre offering certification. This certification is industry standard and very expensive to receive if taken through colleges or private delivery methods)
- Like a grade 11 course (however you get grade 12 credit)
- Learn at your own pace, self-directed with multi-media lessons.
- Learn Microsoft Excel (Intermediate): employee scheduling, tracking expenses, payroll and deductions.
- Learn Microsoft Word (advanced): tables, logos, brochures, directory, columns.
- Learn Microsoft Access (intro): create tables and forms used to store records in a variety of businesses.

BU-BUSINESS INFORMATION MANAGEMENT 12

Prerequisite: None. Open to Grade 10-12 students.

- Optional: Get your "Microsoft Office Specialist Certification" (Sardis is an official testing centre offering certification. This certification is industry standard and very expensive to receive if taken through colleges or private delivery methods)
- Like a grade 11 course (however you get grade 12 credit)
- Learn Microsoft Access (intermediate to advanced): focus on database development using, easy to create interfaces constructed for schools, hospitals, restaurants, retail stores, etc, - valuable skills applicable to any business.
- Learn Microsoft Excel (Intermediate to advanced): mortgages, loans, investments, creating an inventory and custom programmable.

BU-ENTREPRENEURSHIP AND MARKETING 10

Prerequisite: None. Open to all students.

This course has been built to give any student the basics they need to know to start and build their own business. Students will learn how to design webstores, prototype products, design logos, and create advertisements. Students will also learn how to price products and run their own companies. This course is for anyone who wishes to start their own business or is just interested in the business world.

BU-KEYBOARDING 11

Prerequisite: None. Open to all students.

This course is designed to increase the typing speed of students of all experience levels. Typing speed is becoming increasingly important in school, university, and careers and this course intends to improve this asset. All students in this course gain free access to several costly typing programs throughout the length of the course.

BU-MARKETING AND ECOMMERCE 11

Prerequisite: None. Open to all students.

In this course, students will explore the "Four P's of Marketing": price, place, promotion, and product. Students will learn how to create their own website, 3D digital models, as well as video and print advertisements. This course is for anyone who plans on going to business in university, create their own business, or anyone who is interested in how the business world works.

BU-MARKETING AND ECOMMERCE 12

Prerequisite: None. Open to all students.

In this course students will continue to explore the "Four P's of Marketing": price, place, promotion, and product. This course focuses more on e-commerce and will expand student knowledge on creating a web store, building a franchise, and the psychology of business. This course is for anyone who plans on going to business in university, create their own business, or anyone who is interested in how the business world works.

COMPUTER SCIENCE (CS)

CS-COMPUTER STUDIES 10

Introduction to Computer Technology

Prerequisite: A "C+" average in Math 8 and Science 8.

This is an introductory course to computers and the uses in various industries

Students will gain introductory skills in: Programming, Coding, Microsoft Office, Video Game Design and Web Design/Development.

ENGLISH (EN)

The English Department offers several pathways and a variety of equivalent course options in Grades 10-12; each offers a different focus within the English Language Arts curriculum. It is important that the students select courses based on their strengths and areas of interest. While successful completion of an English Language Arts course is

EN-ENGLISH 9

Prerequisite: English 8

Focuses on speaking, listening, and academic reading and writing skills.

Through exploration and reading of several genres of fiction, non-fiction, drama, and poetry, students will begin to learn to critically respond to literary elements in prose and poetry.

Students will be expected to begin developing sophisticated reading and writing skills for further development in grades 10-12.

EN-ENGLISH 10 CREATIVE WRITING AND COMPOSITION (4 CREDITS)

In the **Composition** component of this course, students will develop their academic writing skills through essay and paragraph composition, writing in a variety of modes and engaging in the processes of planning, editing, & refining their ideas for stylistic and grammatical clarity. The **Creative Writing** portion of the course provides students with opportunities to create imaginative and expressive texts for a variety of purposes and audiences. Students will sample the writing of published authors to enhance their own writing skills in genres such as short fiction, poetry, spoken word, drama, and creative non-fiction. Self and peer assessment in the form of writing workshops will develop students' abilities to draft, reflect, edit, and revise their own writing in preparation for the final Portfolio assessment of the course.

EN-ENGLISH 10 LITERARY STUDIES AND COMPOSITION (4 CREDITS)

- In the **Composition** component of this course, students will develop their academic writing skills through essay and paragraph composition, writing in a variety of modes and engaging in the processes of planning, editing, & refining their ideas for stylistic and grammatical clarity. The **Literary Studies** component of this course will focus on literature and the study of literature. Students will learn to critically respond to novels, short stories, poetry, drama, and non-fiction texts through close reading and analysis. Students will also contribute to reconciliation by building greater understanding of the knowledge and perspectives of First Peoples.

EN-ENGLISH 10 NEW MEDIA AND COMPOSITION (4 CREDITS)

In the **Composition** component of this course, students will develop their academic writing skills through essay and paragraph composition, writing in a variety of modes and engaging in the processes of planning, editing, & refining their ideas for stylistic and grammatical clarity. In the **New Media** component of this course, students will learn to responsibly use digital tools and recognize the impact digital media has on their lives. Students will learn to critically respond to fiction and non-fiction, including short stories, novels, poetry, articles and a variety of digital media. Students will also contribute to reconciliation by building greater understanding of the knowledge and perspectives of First Peoples.

EN-ENGLISH 10 FIRST PEOPLES LITERARY STUDIES AND WRITING (4 CREDITS)

English First Peoples Literary Studies 10 is an exploration of authentic First Peoples' texts: novels, short fiction, non-fiction, poetry, drama, and other audio, visual, and digital media. This course is an opportunity for all students to engage with the experiences, knowledge, and perspectives of local, provincial, national, and international Indigenous peoples. Students will develop effective written and oral communication skills in various informal and formal formats to demonstrate understanding and critical thinking. Students will apply various reading strategies to comprehend texts and assess the impact of literary elements. By demonstrating awareness and understanding of First Peoples' cultures, histories and worldviews, students will contribute to reconciliation. English First Peoples Literary Studies 10 fulfills the graduation requirement for Indigenous-focused coursework.

EN-ENGLISH 11 COMPOSITION (4 CREDITS)

Composition 11 will help students develop their writing, reading and thinking skills. This English course will draw from a variety of fiction and non-fiction texts to help students formulate and communicate their thoughts in a clear and organized manner. Possible areas of focus include expository, persuasive and narrative compositions, vocabulary, grammar, and the writing process. Students will also contribute to reconciliation by building greater understanding of the knowledge and perspectives of First Peoples

EN-ENGLISH 11 CREATIVE WRITING (4 CREDITS)

Creative Writing 11 provides students with in-depth opportunities to explore personal and cultural identities, memories, and stories in a wide range of genres, experimenting with, reflecting on, and refining their writing skills for various creative purposes & audiences. Students will develop their craft through the reading and study of a diverse selection of sample texts—written, visual, digital, and oral—as a framework for their own development as writers. Students will engage in processes of planning, drafting, work-shopping, editing, & revising to build a Portfolio of writing that represents their growth and development. Students will also explore text and story to deepen their understanding of the way language constructs personal, social, and cultural identity.

EN-ENGLISH 11 FIRST PEOPLES LITERARY STUDIES AND WRITING (4 CREDITS)

English First Peoples Literary Studies & Writing 11 is an exploration of authentic First Peoples' texts: novels, short fiction, non-fiction, poetry, drama, and other audio, visual, and digital media. This course is an opportunity for all students to engage with the experiences, knowledge, and perspectives of local, provincial, national, and international Indigenous peoples. Students will develop effective written and oral communication skills in various informal and formal formats to demonstrate understanding and critical thinking. Students will apply various reading strategies to comprehend texts and assess the impact of literary elements. By demonstrating awareness and understanding of First Peoples' cultures, histories and worldviews, students will contribute to reconciliation.

EN-ENGLISH 11 LITERARY STUDIES (4 CREDITS)

Literary Studies 11 students will explore specific themes, periods, authors, or areas of the world through fiction and non-fiction works while continuing to develop their reading, writing, and grammar skills established in the Grade 10 English programs. Students will continue to closely read appropriately challenging texts and analyze and respond to short stories, novels, poetry, drama, and non-fiction prose. Students are required to demonstrate mastery of several types of writing and employ a wide range of reading strategies. Students will also contribute to reconciliation by building greater understanding of the knowledge and perspectives of First Peoples.

EN-ENGLISH 11 NEW MEDIA (4 CREDITS)

New Media 11 students will continue to closely read appropriately challenging texts and analyze and respond to written literature (fiction and non-fiction), as well as a variety of digital media. Students are required to demonstrate a command of different forms of writing, the appropriate use of digital tools, and employ a wide range of reading strategies. Students will also explore the ways digital media and technology impact their lives while continuing to develop their reading, writing, and grammar skills established in the Grade 10 English programs. Students will also contribute to reconciliation by building greater understanding of the knowledge and perspectives of First Peoples.

EN-ENGLISH FIRST PEOPLES 12

English First Peoples 12 satisfies the English Language Arts graduation program requirement. This course provides opportunities for all students to learn and engage with Indigenous creative expression and the cultures of First Peoples locally, provincially, nationally, and internationally. The course focuses on the study of authentic First Peoples' texts: written, oral, audio, visual, cinematic, and digital media works (long and short fiction, non-fiction, drama, poetry, song, film, podcasts, etc). Students will further develop their written and oral communication skills through exploration of themes, issues, and topics important to First Peoples. Students will also contribute to reconciliation by building greater understanding of the knowledge and perspectives of First Peoples. Like English Studies 12, EFP 12 meets the entrance requirements for the full range of post-secondary educational programs.

EN-ENGLISH STUDIES 12

English Studies 12 satisfies the English Language Arts graduation program requirement. Students will continue to develop and extend their previous learning in any of the grade 10 and 11 English course options by refining their comprehension and communication skills. Students will think critically and creatively about the uses of language while exploring novels, poetry, drama, short stories, and fiction and non-fiction sources. In exploring these different texts, students will deepen their understanding of themselves and others in a changing world while gaining insight into the diverse factors that shape identity. Students will also contribute to reconciliation by building greater understanding of the knowledge and perspectives of First Peoples.

EN-AP ENGLISH LITERATURE AND COMPOSITION 12 & ENGLISH STUDIES 12 (AELC-12)

Prerequisite: Any Language Arts 11 course

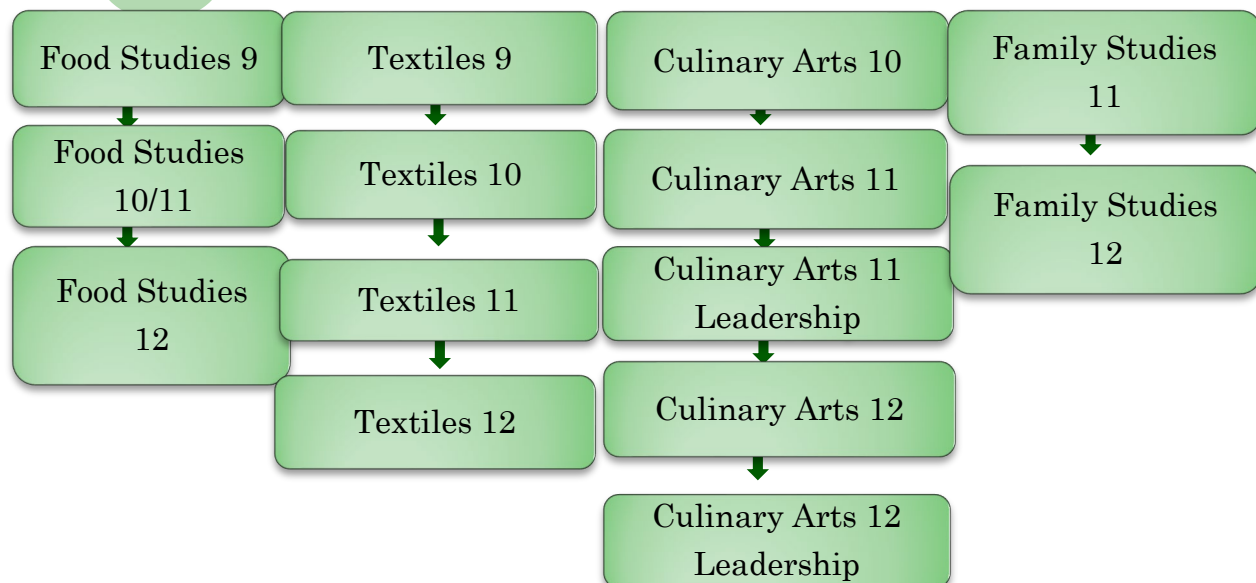

AP English 12 explores the exciting world of English literature, predominantly covering works from the Renaissance up until the modern day. This course surveys a wide variety of stories, such as the epic adventures of knights and heroes, the tragedy and comedy of Shakespeare's plays, the gothic horror and romance of Victorian fiction, and the thought-provoking social commentary of modern fiction. AP English 12 covers most types of literature, including novels, plays, poetry, and short fiction.

This course would appeal to students who have a love of reading and a desire to improve their abilities to think, discuss, analyze, and write about works they read in class. This course is also excellent preparation for students planning to attend a post-secondary institution. The reading and writing skills developed in this course will provide a strong foundation for studies after High School.

AP English 12 meets daily for the entire school year (one block per semester). There is an optional AP English Literature & Composition 12 exam in May, at the cost of approximately \$135 per student. It is this exam score that determines whether a student will be granted college-level credit. This exam does not affect students' school-based mark in any way. AP English 12 is a **12-credit course** that fulfills the learning outcomes of three courses: Advanced Placement Literature & Composition 12, English Studies 12, and Literary Studies 12.

HOME ECONOMICS (HE)

HE-FOOD STUDIES 9

Prerequisite: None. Open to students in grade 9 or 10.

Explore cooking and baking techniques as you create a variety of sweet and savory foods. From easy breads to cakes, egg white foams, soups, sauces, meal items, design challenges and more, you'll learn a variety of cooking and life skills while working cooperatively with others.

HE-FOOD STUDIES 10/11

Prerequisite: None, however Food Studies 9 is recommended. Open to students in Grades 10-12. Intermediate course. Students can take Food Studies 10 and Food Studies 11 in consecutive years as curriculum alternates every second year.

Enhance your culinary skills with techniques to help create food that looks & tastes great.

Prepare a wide variety of foods from around the world.

Develop life skills and discover how good nutrition plays a key role in your health.

Discover a passion for cooking as well as advancing your cooking skills and knowledge.

Students will also develop skills in time management and budgeting while preparing and presenting delicious foods in class.

HE-FOOD STUDIES 12

Prerequisite: Foods Studies 10/11. Open to students in Grade 11 and 12 only.

This advanced cooking and baking course, for the cooking enthusiast, will expand your skills and help you prepare food with professional results that looks and tastes great.

Focus is on developing advanced skills and techniques to take your cooking and baking abilities to the next level.

Prepare specialty breads, pasta, appetizers, soups, stock, salads, salad dressings, entrees, full course meals, desserts, and develop professional decorating skills.

Learn how to improvise, substitute ingredients and create your own recipes.

You will improve your efficiency in the kitchen and expand your abilities to create a quality meal with a style that will impress any guest.

Explore Fusion Cuisine as part of the final project in Food Studies 12, where you will have the opportunity to blend the ingredients of different culinary traditions into one unique dish.

CULINARY ARTS OVERVIEW

Students enrolled in Culinary Arts take the BC Food Safe Level 1 course before their introduction to our professional teaching kitchen. Students learn basic cooking and baking principles, knife and equipment skills. Students enrolled in the program assist in the daily production of food for a student body and staff, of over 1500 persons. This program is very much a hands-on, work-orientated class, ideally suited to a variety of learning styles and abilities.

HE-CULINARY ARTS 10

Prerequisite: Food Studies course. Open to students in Grades 10-12.

Learn how to prepare entrees, baked goods, soups and salads.

Safe food handling techniques.

Acquire teamwork, organizational and employment skills.
Food Sustainability.

HE-CULINARY ARTS 11

Prerequisite: Culinary Arts 10. Open to students in Grades 10-12.

Learn more advanced techniques in food preparation and presentation.

Learn about dietary and cultural influences in cooking.

HE-CULINARY ARTS 12

Prerequisite: Culinary Arts 11. Open to students in Grade 11 or 12.

Work more independently to develop cooking skills while preparing a large variety of foods.

An excellent foundation for cooking at the college level.

Career Exploration in the Food Industry.

HE-CULINARY ARTS LEADERSHIP 11

Prerequisite: Culinary Arts 12

- This course is designed for those who are interested in pursuing the Culinary Arts as a career option.
- It will continue to build on the cooking skills that were introduced in the previous culinary classes and will provide opportunities for developing leadership and kitchen management skills.
- Introduction to some basic psychological concepts such as communication styles and conflict resolution will give students a greater understanding of interpersonal dynamics and prepare them to be a better leader.

HE-CULINARY ARTS LEADERSHIP 12

Prerequisite: Culinary Arts Leadership 11

This course builds on the concepts of Leadership 11. Mentorship will be a large focus of this

course as well as menu planning and kitchen management.

HE-FAMILY STUDIES 11

(INTERPERSONAL & FAMILY RELATIONSHIPS)

Prerequisite: None. Open to students in Grades 10-12 only.

Develop communication skills to help you be confident in how you present yourself and how you relate to others. Curious about the ins and outs of teen relationships? Get to know yourself and others better as you learn about the issues related to healthy and unhealthy relationships. Explore socio-cultural influences including the media, relationship dynamics, individual characteristics and traits that people bring to relationships, as well as other teen issues.

Introduces concepts related to conception, pregnancy, infant care, child development, birth order, attachments, parenting and parenting styles

HE-FAMILY STUDIES 12

(CHILD DEVELOPMENT & CAREGIVING)

Prerequisite: None. Open to students in Grade 11 or 12 only.

A comprehensive exploration of conception, pregnancy, infant care, and child development to age 12.

As we explore the physical, emotional, cognitive and social development of children, you'll come to understand children's needs and how to meet them.

There are many opportunities for hands on learning including the real life simulation of caring for an infant.

HE-TEXTILES 9

Prerequisite: None. Open to students in Grade 9 or 10.

Learn how to make your own clothes and accessories! Textiles 9 is an introductory course to basic sewing skills using sewing machines, sergers and hand stitching.

Several projects will be prepared in class to introduce you to garment construction.

Students will work with woven and knit fabrics to make projects such as PJ shorts and hoodies. Most students complete 3-5 projects using a variety of sewing techniques and fabrics.

Students will apply the design process to create an interactive children's book

HE-TEXTILES 10

Prerequisite: None, however Textiles 9 is recommended. Open to students in Grades 10-12.

Increase your skill level as you make your own clothes and accessories! This course is useful for beginners as well as those who have already completed a year of Textiles studies in Grade 9 or middle school.

Textiles 10 builds on your basic sewing skills using sewing machines, sergers, and hand stitching to create projects suited to your skill level. Several projects will be prepared in class including two garments (depending on your skills, this can include a t-shirt or hoodie, and pants, shorts or a skirt).

Create a bag, and learn how to 'upcycle' – taking a ready-made item and turning it into something new. Learn how to enhance your personal wardrobe by assessing garment quality, developing shopping strategies, and understanding your role as a consumer of retail clothing.

HE-TEXTILES 11

Prerequisite: Textiles 9 or 10. Open to students in Grade 11 and 12 only.

Expand your knowledge of sewing skills and textiles in Textiles 11. Prior sewing experience in Textiles 9 or 10 is required, as you will create new garments and wearable art in this course. Construct a variety of projects, determined in class based on your experience, interest and skill level.

Develop your knowledge of fashion and design principles and gain an understanding of theories related to fashion trends and of how culture, media, retailing, and environmental and social factors influence consumer behaviour.

Learn how to repurpose items, modify patterns and explore the elements and principles of design and textile functionality.

HE-TEXTILES 12

Prerequisite: Textiles 11. Open to students in Grade 11 and 12 only.

Focus on fashion in this advanced Textiles 12 course, which builds on your prior sewing experiences.

Several projects will be constructed based on your individual interests, experience, and abilities. Experiment with fibers and fabrics as you construct several projects.

Learn about the relationship between fiber content, fabric type and textile use as you select advanced projects using fabrics that are more challenging to work with.

Investigate aspects of the fashion industry, consumerism and the social and historical influences on fashion

HUMAN SERVICES (HS)

HS-INTRODUCTION TO COUNSELLING SKILLS 11

Prerequisite: None

Course is designed to introduce students to the basic skills necessary to establish and maintain successful helping relationships with peers, family members and other members of society. Students will develop skills in the areas of interpersonal communication, empathic listening, questioning techniques, ethics, referrals, decision-making and problem solving, peer mediation, mentoring, suicide prevention awareness, assertiveness training, anger management, mental health challenges, types of therapies, self-analysis and self-care. Students will be introduced to skills necessary for working in Human Services: counselling, social work and teaching. Evaluation components: journal, various assignments, major mental health project and group work. Students will complete a 7-week practicum volunteering as an EA in an elementary school classroom.

HS-INDIGENOUS LEADERSHIP 10

Prerequisite: an approved application

This course is a program to engage and support Indigenous students in the development of leadership and mentorship skills grounded in Indigenous Ways of Knowing and Being. Students taking this course will develop a better understanding of who they are and where they come from while learning about traditional Indigenous ideologies and methods of leadership. Students will be supported through in class coursework and field experiences with the goal of increasing levels of self-awareness, communication skills, organization, community building and cooperative relationships. Along with their teacher, students will be working with Indigenous leaders, mentors and role models from our local Indigenous communities, reflecting on the value of sharing knowledge and ideas about leadership. Applications can be found on our school website at <https://sardissecondary.sd33.bc.ca/course-planning> and returned to the SSS school office. At this time, this course does NOT satisfy the Ministry of Education's graduation requirement of an Indigenous Focused course.

HS – LEADERSHIP 9/10

Prerequisite: a "C+" or better and "G" average, and approved application

The purpose of student leadership is to: Learn and develop as a leader; inspire students to make a difference in our school, community, and world; promote the "columns of character" in our school: respect, integrity, perseverance, passion, empathy, accountability, and achievement.

Leadership is a project-based course that requires students to actively participate in organizing purposeful school and community events, such as assemblies, fundraisers, spirit activities, community events, etc. In Leadership 9/10 there will be a focus on what it means to be a leader, the development of leadership skills in each student, and "how-to's" of organizing events.

Students will also be required to attend events and service opportunities outside of class time.

Applications can be found on our school website at <https://sardissecondary.sd33.bc.ca/course-planning> and returned to the SSS school office.

HS-LEADERSHIP 11/12

Prerequisite: a "C+" or better and "G" average, and approved application

The purpose of student leadership is to: Learn and develop as a leader; Inspire students to make a difference in our school, community and world; Promote the 'columns of character' in our school: respect, integrity, perseverance, passion, empathy, accountability and achievement.

Leadership is a project-based course that requires students to actively participate in organizing purposeful school and community events, such as assemblies, fundraisers, spirit activities, community events, etc. In Leadership 11/12 students will be able to apply the skills, theory and core leadership values developed in Leadership 9/10 and continue to develop their leadership abilities.

Students will also be required to attend events and service opportunities outside of class time.

Applications can be found on our school website at <https://sardissecondary.sd33.bc.ca/course-planning> and returned to the SSS school office.

HS-MINDFULNESS AND MOVEMENT 11

Prerequisite: None.

This course will allow students to participate in gentle forms of movement such as yoga, Pilates, walking, and other forms of light exercise. Students will explore various breathing and meditation techniques as well as other mindful activities. Students will learn about strategies to help manage stress and regulate emotions. A focus on connection to oneself and others will be emphasized. This course is open to students in grade 11-12 of all levels and abilities.

HS-PEER TUTORING 11/12

Prerequisite: Permission of instructor *Students must contact their counsellor for application form for approval, otherwise an "Alternate Elective" will be scheduled.

This course provides students interested in the Human Services and the teaching profession an opportunity to experience and reflect on teaching in a real classroom setting.

Peer Tutoring is a combination of teaching/learning theory and application with an emphasis on working with a teacher in a specific subject/grade level that they have completed themselves previously. Students experience working with other students in one-on-one or small group situations in the student's designated block. Current teaching and learning theory is examined, discussed, and applied in practicum situations. Assessment focuses on the students' reflection and growth as shown through online assignments, and self and placement teacher evaluations. Students in Peer Tutoring 11 will prepare (not teach) a lesson for their placement class. In Peer Tutoring 12, the students will prepare and teach short lessons, and receive feedback from their placement teacher.

HS-PSYCHOLOGY 11A

Prerequisite: Open to students in Grades 10-12. Student must have good reading skills. It is strongly recommended that students have a C average in their previous English course.

Basic Introduction to Psychology - Scientific study of behavior and the mind

Of interest to students who want to understand people- why they do the things they do and think the way they think. Understand yourself and others more.

Topics include a history of psychology, communication, social thinking and social relations, prejudice and discrimination, attraction, the brain, nervous system and hormonal systems, lifespan development, sensation and perception, stress and health, learning, and intelligence, abnormal behavior and disorders, personality and personality disorders, sleep and dreams, psychological disorders, mental health challenges, personality disorders and types of therapies.

Valuable to students entering human services professions, possible avenue into human services Career Prep Program.

Evaluation will be through assignments, videos, projects, experiments, and tests.

HS-PSYCHOLOGY 11B

Prerequisite: Recommended Psychology 11A.

This course builds on concepts learned in Psychology 11A

Scientific study of behavior and the mind

Of interest to students who want to understand people- why they do the things they do and think the way they think. Understand yourself and others more.

Topics include how we learn, memory, states of consciousness- sleep and dreams, hypnosis, drugs, sensation and perception, color psychology, influence of music, types of learning, classical and operant conditioning, the brain, nervous system, thinking, language, intelligence, personality, psychological disorders, personality disorders, psychological and biomedical therapies, cultural psychology, theories of personality

Valuable to students entering human services professions, possible avenue into human services Career Prep Program

Evaluation will be through assignments, videos, projects, experiments, and tests.

HS-AP PSYCHOLOGY 12

Prerequisite: Psychology 11A and 11B advised. Open to students in Grade 12. Not advised for students in grade 11. It is recommended that students have a B grade in English 11.

Extensive reading and vocabulary involved

Introductory Psychology similar to first year college-level Psychology

Students can develop their background in the Psychology field, particularly those entering the Human Services professions

Topics included are: research methods, stress and health, endocrine and nervous systems, the brain, sensation and perception, states of consciousness, memory, intelligence, motivation emotion, personality, psychology disorders, treatment, and psychotherapy, and social psychology.

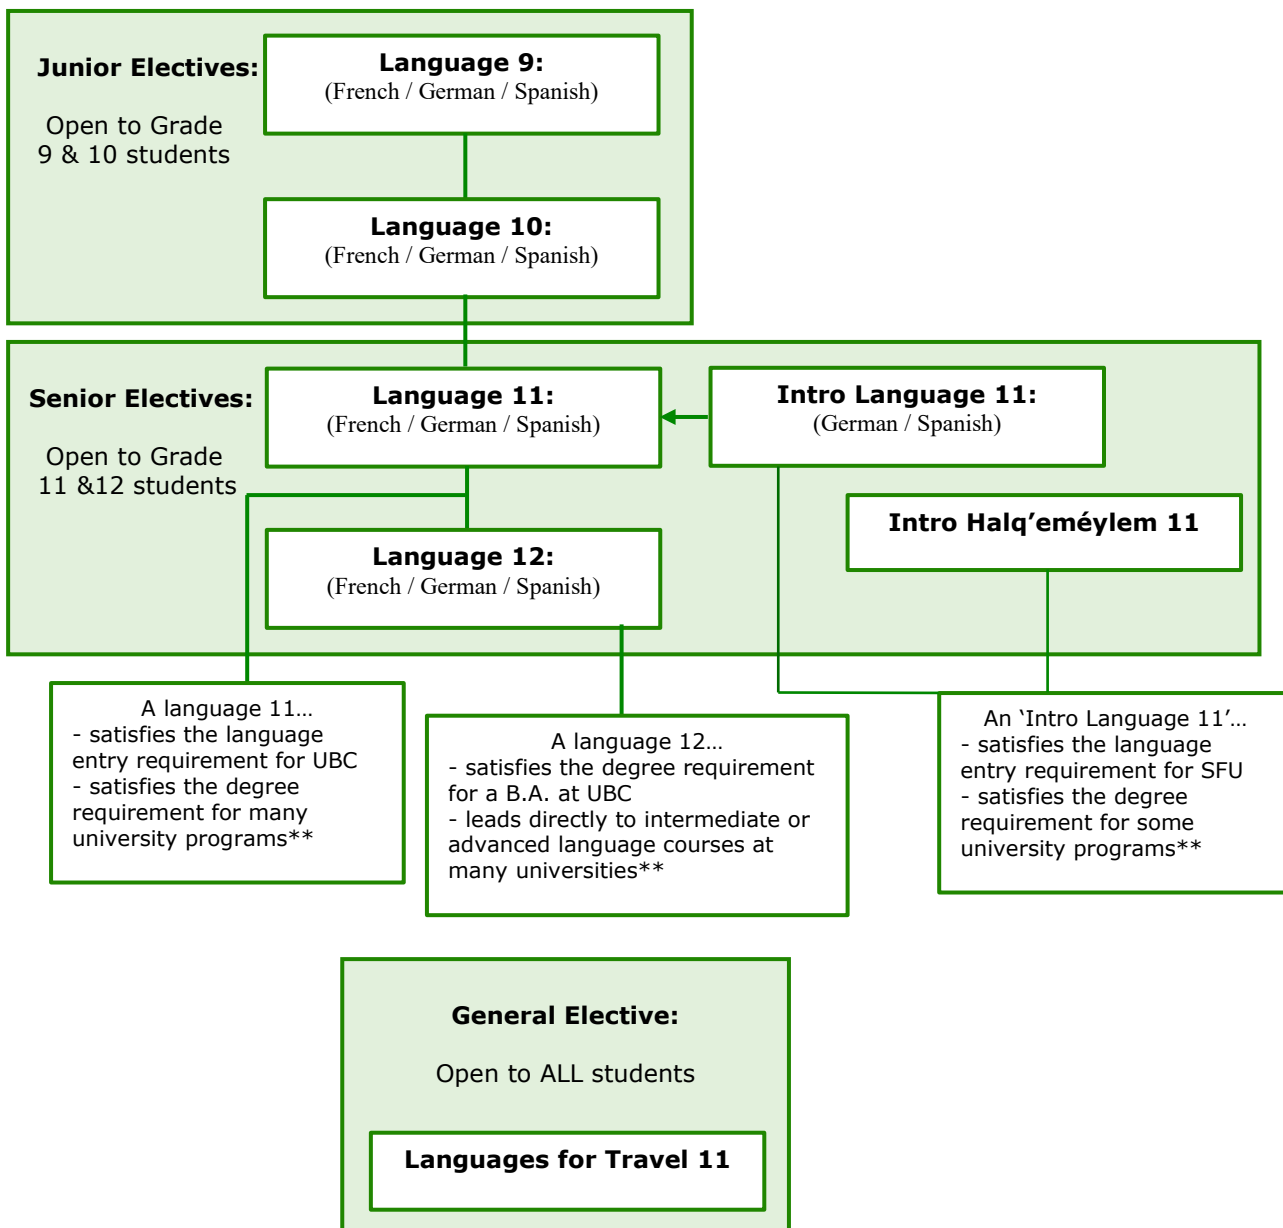

Evaluation will be through assignments, projects, quizzes and tests, long answer questions, written reports.

Optional AP Psychology exam in May for a cost of \$135 (For University Course Credit)

MODERN LANGUAGES (LA)

NOTE: Although not a graduation requirement, a second language at the Grade 11 level is required by some British Columbia Universities depending on your intended field of study. Students should clarify their Language requirement with their counselor and the post-secondary institution they plan to attend.

If you speak German, French or Spanish at home, or recently dropped out of French Immersion, talk to the teacher and your counsellor BEFORE choosing your language level.

**** Each university has its own entry requirements. Connect with your counsellor if you have questions about which language courses are required for your specific program(s).**

LA-FRENCH 9

Prerequisite: French 8

- Are you heading to university and know that most require a "Language 11" credit at some point? Or perhaps you understand that Canada is a bilingual country, and that French is useful? Or better yet, you are passionate about languages and the many professional doors that they open? Then French 9 is the course for you!
- Using a communicative approach combining listening, speaking, reading and writing activities, students will further develop their oral and written abilities.
- French is not just an academic study – students will engage in French-speaking cultures through food, movies, music and other cultural activities. Topics covered include family, food, home, health, and travel in French-speaking countries.
- Students will continue to identify similarities and differences between French cultures and their own.

LA-FRENCH 10

Prerequisite: French 9

- Since you have invested this much time into learning French, don't give up now! Set yourself the goal of becoming bilingual (or even trilingual!) in your time at Sardis.
- Students will gain confidence in their ability to use the French language as they continue to acquire French through Comprehensible Input.
- Classroom activities include discussions, storytelling, independent reading, music and film appreciation, picture talks, movie talks, whole class novels, and games.
- Emphasis will be on developing students' proficiency and ability to use high frequency vocabulary and grammar structures in spontaneous situations with confidence.

LA-FRENCH 11

Prerequisite: French 10 (80% or better is recommended)

- You have taken French 10 and had so much fun that you can't wait for more? Don't wait! Sign up for French 11 and enjoy more French food, history, music, and other cultural activities, while communicating in French!
- Students will become increasingly proficient through complex Comprehensible Inputs.
- Classroom activities include discussions, storytelling, independent reading, music and film appreciation, picture talks, movie talks, whole class novels, and video series.
- Students will deepen their understanding of the current issues facing the francophone world today and gain an increasingly sophisticated understanding of the connections between language, personal story, and culture.
- This course satisfies many university entrance and program language requirements in BC

LA-FRENCH 12

Prerequisite: French 11 ("B" or better in French 11 is recommended)

- You have taken French 10 and French 11 – why stop now?!? Take another big step towards being bilingual, and count yourself among the dedicated few, the crème de la crème.
- Did you know that French 12 gives you the Graduation Language Requirement for a Bachelor of Arts degree at UBC?
- Students will continue to acquire advanced vocabulary and grammatical structures through Comprehensible Input.
- Classroom activities include discussions, storytelling, independent reading, music and film appreciation, picture talks, whole class novels, video series, and podcasts.
- Students will gain an increasingly sophisticated understanding of multi-cultural and political issues in the francophone world today through exposure to current literature and authentic documents.
- Students will also engage in cooperative projects to learn more about the connections between personal story, language, and culture.

LA-GERMAN 9

Prerequisite: None.

- Oktoberfest, fast cars, sausages, and pretzels – sign up for German to find out the truth behind the stereotypes.
- Open to students in any grade wishing to gain a solid foundation in German
- Designed to provide students with a basic knowledge of the language, you will be confident to communicate in German at an introductory level.
- You will also be introduced to the geography, history, and culture of German-speaking countries, and make comparisons with your own culture.
- Similarities in the structure and vocabulary of German, French and English are explored.

LA-GERMAN 10

Prerequisite: German 9

- You worked hard through German 9 and now you cannot wait to build on the great foundation you already have.
- Examine the truth behind more stereotypes and try German foods, music and movies.
- Emphasis is placed on oral skills and vocabulary development.
- Reading and writing will be taught in conjunction with each unit.
- Together with German 9, the course gives the student a good foundation in basic German vocabulary and oral skills.

LA-GERMAN 11

Prerequisite: German 10, or Introductory German 11 ("B" standing or better is recommended)

- You took Introductory German 11, and had so much fun that you can't wait for more? Don't wait! sign up for German 11 and enjoy more German food, history, music, and other cultural activities, while communicating in German!
- Language is all about communication, and by the end of this course you will be making yourself understood in German, using intermediate listening, speaking, reading and writing activities, including discussions, storytelling, music and film appreciation, novels, and video series.
- You can't communicate without words, and you'll be bringing your total to over 1600 of them, as well as learning intermediate grammatical structures.
- Students will gain an increasingly sophisticated understanding of the connections between language, personal story, and culture.
- Various assessment strategies are used to evaluate student progress.
- This course satisfies many university entrance and program language requirements in BC.

LA-GERMAN 12

Prerequisite: German 11 ("B" or better in German 11 is recommended)

- You have taken German 9, 10, and 11 - why stop now?!? Take another big step towards being bilingual (or trilingual), and count yourself among the dedicated few, die Besten der Besten.
- Did you know that German 12 gives you the Graduation Language Requirement for a Bachelor of Arts degree at UBC?
- Increase your vocabulary to 2500 (or over 80% of common communication words) through advanced listening, speaking, reading, and writing activities, and master the grammar needed for everyday communication.
- Students will gain an increasingly sophisticated understanding of multi-cultural and political issues in German-speaking countries through a variety of activities and resources, including discussions, storytelling, independent reading, music and film appreciation, picture talks, novels, video series, and podcasts.
- Various assessment strategies are used to evaluate student progress.

LA-HALQ'EMÉYLEM 11

Prerequisite: None

In this course, students will focus on the Upriver - Halq'eméylem language spoken by the Stó:lō people on whose land our community lives, works, and goes to school. Students will actively engage in and gain insight into the Stó:lō culture, be inspired through the development of intercultural understanding, and join in Indigenous language revitalization. Successful completion of this foundational course prepares students for progression into higher levels of study in Halq'eméylem and Stó:lō cultural learning. Apart from the benefits Halq'eméylem education provides First Nations People, it would also benefit non-aboriginal students living in our diverse community. This course welcomes all students. Halq'eméylem 11 is a four-credit course and satisfies the grad requirement of an Indigenous-focused course for graduation.

LA-SPANISH 9

Prerequisite: None

Tacos, beaches, ponchos and bullfights....is that all there is to know about Hispanic culture? The world is your oyster if you can speak a second language, so why not join the 500 million Spanish speakers around the world! Open up your mind and create options for studying, working and living abroad.

Open to any student wanting foundational skills in Spanish

Speak, read and write Spanish at a rudimentary level.

Explore the geography, history and culture of Spanish-speaking countries.

Discover the similarities in the structure and vocabulary of Spanish, French and English.

LA-SPANISH 10

Prerequisite: Spanish 9

"A very high energy class" (B.J.) "You can speak with fellow Spanish citizens at home or on Spanish vacations" (E.R.)

Through movies, music and games, students will further explore Hispanic cultures, history and geography.

Build on previous foundations of oral, written and reading foundations, with an emphasis on aural / oral skills and vocabulary development.

Apply the similarities between Spanish, French and English to the structures and vocabulary of Spanish.

LA-SPANISH 11

Prerequisite: Spanish 10 or Introductory Spanish 11("B" standing or better in Introductory Spanish 11 is recommended)

"This class is not all textbook work; we have the most practical cultural experiences" (M.E.)

"You get to watch cool Spanish movies" (C.E.)

"Sing Enrique Iglesias like a professional!" (R. C.)

Acquire enough communication skills and personal confidence to spend entire classes in a café – 100% immersed in Spanish! Performing real life tasks such as this one is one of best indicators of your progress in the Spanish language.

Students will expand their abilities in speaking, listening, writing and reading Spanish through field trips, movies, discussion and debates, music and creative writing assignments.

Deepen understanding of the current social, political, and economic issues facing Hispanic immigrants today.

Various assessment strategies used to evaluate student progress.

This course satisfies many university entrance language requirements in BC.

LA-SPANISH 12

Prerequisite: Spanish 11 ("B" standing or better in Spanish 11 is recommended.)

Spanish 12 is only offered on even years in the spring semester, so please plan your Spanish course choices accordingly. It is offered in 2024/25, 2026/27, 2028/29 ...; and NOT the years in between.

"Hola Señorita Blaak, I'm studying at UFV now, but am going to Barcelona, Spain in February, and studying there until June 30th. Although, I am currently in the Bachelor of Science program and will be placed in the bio sciences faculty in Spain, I would like to take a Spanish course while I am there, so I can immerse myself in the language." (S.T.)

Many Sardis Spanish 12 grads have been awarded internships, co-op work opportunities and practicum experiences in the following fields: medical, sciences, human services and international relations and development. Would you benefit from these incredible opportunities as well? Refine your aural / oral communication abilities through field trips, in class debates, discussions and films. Students will refine their understanding of the multi-cultural and political issues facing Hispanic cultures today by exposure to current literature and authentic documents and gain a deeper appreciation of the historical Spanish influences in today's Canadian and Hispanic societies by further exploring Hispanic art, music, and dance.

LA-INTRODUCTORY GERMAN 11

Prerequisite: None.

Did you make a big mistake by not taking German 9 and 10? Well, we're all entitled to make mistakes. Luckily for you, there is Introductory German 11.

Warning: this course is an intense combination of GE9 and GE10. If you are not academically strong, or if you wish to take your time and learn German properly, you should consider taking German 9 and 10 instead (yes, senior students may take a junior language course).

Language is all about communication. By the end of this course you will be making yourself understood in German, using introductory listening, speaking, reading, and writing activities. You can't communicate without words, and you'll be learning over 800 of them, as well as introductory grammatical structures.

Here's the really fun part: we get to experience some cultural aspects of German-speaking countries. This means field trips, food, movies, music, etc.

Various assessment strategies are used to evaluate student progress (not just tests, but all sorts of creative assignments too).

LA-INTRODUCTORY SPANISH 11

Prerequisite: None.

Coulda...woulda...shoulda taken Spanish 9 and 10, but didn't? It's not too late! This course is for you if need to fast track to Spanish 11 in one semester. Designed for senior students - junior students please refer to Spanish 9 and 10.

Warning: this course is an intense combination of SP 9 and SP 10. Senior students should take the junior language courses (Spanish 9 and 10) for a more comprehensive and in-depth language learning experience.

"Spanish learning and speaking makes other academic courses easier (memory capacity, studying techniques, mathematical thinking)" (R.E.)

"It opens opportunities to study at universities in non-English speaking countries" (C.E.)

Please refer to Spanish 9 and 10 for specific learning outcomes and methods used to teach language development. Movies, music and interactive-communicative games are the basis for class activities.

LA-LANGUAGES FOR TRAVEL 11

Prerequisite: None

Would you like to travel to exotic places, but you're too worried about not understanding the language? Or maybe too scared of making a serious cultural mistake? Do you like learning about history, but don't like exams? Then this is the course for you! Introduction to several languages, including a global language (like French or Spanish), a regional language (like German or Italian) and an endangered language (Halq'emeylem), as well as history and culture associated with them. This course encourages students' interest in discovering other cultures and equips students with skills for international and intercultural travel. Assessment is through assignments and projects as well as the students' use of the target languages in class.

FRENCH IMMERSION (LF)

Students must successfully complete the following ten courses to receive their bilingual graduation diploma.

LF-FRANÇAIS LANGUE 9

Prerequisite: Français Langue 8

Students must be prepared to speak French at all times within the classroom setting.

Focus on spontaneous, prepared use of French language, grammar study, and the creation and refinement of diverse communication.

Builds on strategies to negotiate meaning in a variety of documents.

Evaluation includes classroom activities, tests, projects, and participation in French, as well as final oral exam worth 10%.

LF-FRANÇAIS LANGUE 10

Prerequisite: Français Langue 9

Students must be prepared to speak French at all times within the classroom setting.

Focus on spontaneous, prepared use of French language, grammar study, and the creation and refinement of diverse communication.

Builds on strategies to negotiate meaning in a variety of documents.

Evaluation includes classroom activities, tests, projects, and participation in French, as well as final oral exam worth 10%.

LF-FRANÇAIS LANGUE 11

Pre-requisite: Français Langue 10

Students must be prepared to speak French at all times within the classroom setting

Focus on a refinement of spontaneous and prepared use of the French language; organizing, researching and communicating ideas; developing strategies to improve comprehension.

Includes grammar review, and literature study and analysis.

Evaluation includes classroom activities, tests, projects, and participation in French, as well as final oral exam worth 10%.

LF-FRANÇAIS LANGUE 12

Required Provincial Assessment: Évaluation de la Littératie en Français langue seconde-immersion de la 12e année. The result on this exam does not impact success in the course, nor is it used for calculating grade point average but the successful writing of it is required for fulfillment of Ministry

Bilingual Dogwood requirements.

Prerequisite: Français Langue 11

Students must be prepared to speak French at all times within the classroom setting.

Focus on a refinement of spontaneous and prepared use of the French language; organizing, researching and communicating ideas; developing strategies to improve comprehension. Includes grammar review, and literature study and analysis.

Course mark includes extensive oral practice, grammar review, and practice writing, as well as a study of various Francophone texts.

LF- MATHÉMATIQUES 9

Prerequisite: Math 8 (This course is taught in French)

Topics include Rational numbers, Exponent Laws, Polynomials, Solving Linear Equations, Scale diagrams, Probability, and Finance.

Students taking this course can progress to Foundations and Pre-Calculus Math 10.

LF-SCIENCES HUMAINES 9

Prérequis: Sciences Humaines 8

Social Studies 9 is a required course and will include content from 1750-1919.

Students will inquire about how emerging ideas and ideologies profoundly influence societies and events; the physical environment influences the nature of political, social, and economic change; and disparities in power alter the balance of relationships between individuals and between societies.

This course is taught in French.

LF-SCIENCES HUMAINES 10

Prerequisite: Sciences Humaines 9 (C+ standing or better recommended.)

Social Studies 10 is a required course for graduation.

The area of focus is on Canada and the World from 1919 to present.

Major themes: Global and Regional Conflicts, The development of Political Institutions, World Views and different perspectives, Historical and Contemporary Injustices.

This course is taught in French.

LF-EXPLORATIONS EN SCIENCES HUMAINES ET SOCIALES 11

Prerequisite: Sciences Humaines 10

This course will explore various topics in Social Studies.

Major themes include but are not limited to, colonialism and contemporary issues for indigenous people in Canada and around the world; recognition of and response to genocide; current issues in local, regional, national or global politics as represented in mass media; and systems of power and governments in global cultures.

This course is taught in French.

LF-CIVILIZATIONS COMPAREES 12

Prerequisite: Explorations en Sciences Humaines 11 (C+ standing or better recommended)

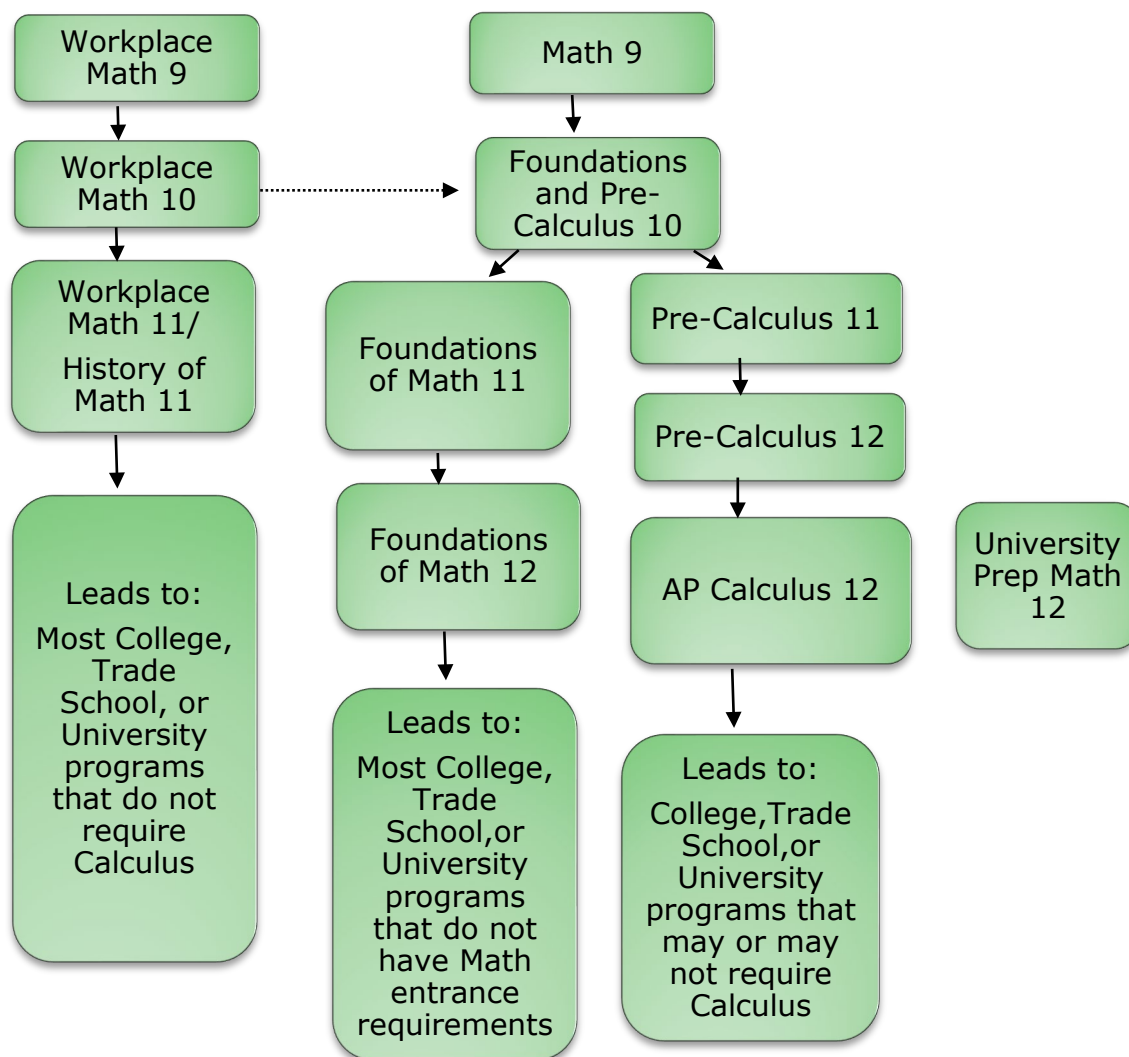

This is an interdisciplinary course focused on language development around issues pertaining to multiple aspects of society, both historical and current. Using key moments and developments from ancient history as a backdrop, we will be exploring and connecting to important concepts in philosophy, art, science and technology, literature and mythology, and politics. Students will learn and use French relevant to their current and future world as they use historical precedents to examine modern issues. These issues **include** (but are not limited to) the impact of technology and art forms on society, democracy and authoritarianism, ethical decision-making and problem solving in the modern world. Students will be encouraged to personalize their learning and draw on multiple subject areas as they engage in this course.

MATHEMATICS (MA)

The Mathematics Department currently offers four math programs for grade 11 and three for Grade 12: Workplace Mathematics 11; History of Mathematics 11; Foundations of Mathematics 11 & 12; and Pre-Calculus Math 11 & 12. At the grade 10 level, the Math Department offers Foundations & Pre-Calculus 10 and Workplace Math 10. Workplace Math is designed for students who plan to pursue a career in a trade or plan on entering the workplace directly upon graduation. Foundations of Math is designed for students planning to pursue a post-secondary program that does not require Calculus. Pre-Calculus Math is designed for students planning to pursue a post-secondary program that does require Calculus. **The Math Department strongly advises students to research post-secondary programs that they are interested in before choosing any math program.**

MA-MATH 9

Prerequisite: Math 8

Topics include Rational numbers, Exponent Laws, Polynomials, Solving Linear Equations, Scale diagrams, Probability, and Finance.

Students taking this course can progress to Foundations and Pre-Calculus Math 10. Students will be required to write a final, summative exam at the end of the semester.

MA-FOUNDATIONS & PRE-CALCULUS 10

Prerequisite: Math 9

Topics include Radicals, Coordinate Geometry, Functions and Relations, Linear Functions, Polynomial Operations, Quadratics Functions, Trigonometry, and Measurement.

Students taking this course can progress to either Foundations of Math 11 or Pre-Calculus Math 11 with teacher recommendation. Students will be required to write a final, summative exam at the end of the semester.

MA-FOUNDATIONS & PRE-CALCULUS 10 HONOURS

Prerequisite: Math 9 with teacher recommendation

For Course Topics see Foundations Math 10.

Course will be enhanced with additional problem-solving activities.

Students taking this course are being prepared for Pre-Calculus 11, 12 and AP Calculus 12. Students will be required to write a final, summative exam at the end of the semester.

MA-FOUNDATIONS OF MATH 11

Prerequisite: Foundations and Pre-Calculus Math 10

*This course is intended for students who plan to take a College or University program that does not require Calculus (i.e. Arts, Humanities).

Topics include Measurement, Geometry, Logical Reasoning, Statistics, and Relations and Functions. A Graphing Calculator (T1-83 or 83 Plus are recommended) is essential for the successful completion of this course.

Evaluation according to mastery of the criteria of the course as defined by the Ministry of Education. A comprehensive final examination worth 30% of the student's final mark

This course is a prerequisite for Foundations of Mathematics 12.

MA-FOUNDATIONS OF MATH 12

Prerequisite: Foundations of Mathematics 11

This course is intended for students planning to take a College/University program not requiring Calculus (e.g. Arts, Humanities).

Topics include Financial Mathematics (Interest, Investments, Mortgages), Combinatorics, Probability, Graphical Regression Analysis and Geometric Explorations (Fractals, Constructions, Conics).

A Graphing Calculator (T1-83 or 83 Plus are recommended) or alternative may be required for the successful completion of this course. Evaluation according to mastery of the criteria of the course as defined by the Ministry of Education.

A comprehensive final examination worth 30% of the student's final mark.

MA-PRE-CALCULUS 11

Prerequisite: Foundations and Pre-Calculus Math 10

This course is intended for students who plan to take a College or University program that requires Calculus (i.e. Sciences, Engineering, Business ...) and some trades programs.

Topics include Algebra, Trigonometry, and Relations and Functions.

A Graphing Calculator (T1-83 or 83 Plus are recommended) is essential for the successful completion of this course.

Evaluation according to mastery of the criteria of the course as defined by the Ministry of Education. Students will be required to write a final, summative exam worth 30% of their overall grade at the end of the semester.

MA-PRE-CALCULUS 12

Prerequisite: Pre-Calculus 11

This course is intended for students who plan to take a College or University program that requires Calculus (i.e. Sciences, Engineering, Business ...) and some trades programs.

Topics include Trigonometry, Relations and Functions, and Combinations and Permutations. A Graphing Calculator (TI-83 or 83 Plus are recommended) is essential for the successful completion of this course.

Evaluation according to mastery of the criteria of the course as defined by the Ministry of Education. Students will be required to write a final, summative exam at the end of the semester.

MA-AP CALCULUS 12 AB

Prerequisite: Pre-Calculus Math 11 and should have completed or be taking Pre-Calculus Math 12 concurrently (Sem 1).

This course is equivalent to 1st year calculus at U.B.C. or S.F.U.

Credit is given for this course at major universities if a sufficiently high score is achieved on the optional AP exam written in May (cost \$135).

Topics include First and Second Derivatives, Implicit Differentiation, Curve Sketching, Integration and Problem Solving.

This course is very beneficial for students going into mathematics or science related fields.

This course may also benefit students requiring only one university level calculus course or wishing to make their first year easier.

If you have any questions, please contact Mr. Balsillie. A comprehensive final examination is given worth 30% of the student's final mark.

MA-WORKPLACE MATH 9

Prerequisite: Math 8

This course is designed for students who have difficulty with the more abstract concepts found in Math 8.

Topics covered include integers, rational numbers, the measurement of 2-D and 3-D objects, geometry, and the basics of finance.

Students taking this course will progress to Workplace Mathematics 10.

The Workplace stream will lead to graduation but will not meet minimum university entrance mathematics requirements.

MA-WORKPLACE MATH 10

Prerequisite: Math 9

This course is designed for students who plan to pursue a career in some trades and for students who have difficulty with the more abstract concepts found in Foundations and Pre-Calculus Math 10.

Topics covered include the metric and imperial systems, the measurement of 2-D and 3-D objects, geometry, trigonometry and the basics of income, spending and debt.

Students taking this course will progress to Apprenticeship and Workplace Mathematics 11.

Consult your Math teacher before selecting. Many university programs require Foundations of Math 10 as an entrance requirement.

MA-WORKPLACE MATH 11

Prerequisite: Workplace Mathematics 10

Practical math for students who experience difficulty with more abstract concepts found in Foundations of Math 11.

Topics include slope and ratio change, graphical representations, surface area, volume, capacity, trigonometry, scale representations; financial services and personal budgets.

Consult your current Math teacher before selecting this course. Many university programs require Pre-Calculus 11 or Foundations of Math 11 as an entrance requirement.

Evaluation according to mastery of the criteria of the course as defined by the Ministry of Education.

MA-UNIVERSITY PREP MATH

This course is designed to cover the concepts that are left out of the Pre-Calculus stream of Mathematics that are important prerequisites for many university level math courses.

Concepts to be covered include geometry, probability, statistics, logic and reasoning, and linear algebra.

This course is a high level mathematics course designed for those who have completed Pre-Calculus 12 and/or are interested in attending Canadian and American universities.

MUSIC (MU)

MU-CONCERT BAND 9/10

Prerequisite: Previous level of Band or permission of instructor.

Performance course for young musicians who would like to continue developing musical ability on their chosen instrument.

Some co-curricular rehearsals may be required.

Learning will be assessed through performance tests, class performance, class participation, attendance, assignments, concerts, practising, and general effort.

All performances are mandatory.

Students are required to provide their own instrument or rent one from a music store.

MU-CONCERT BAND 11/12

Prerequisite: Previous level of Band or permission of instructor.

A performance course for the student who would like to continue to develop abilities on their chosen instrument.

Students may be required to attend co-curricular rehearsals.

Assessment through performance tests, class participation, extra rehearsals, concerts, class performance, attendance, assignments, practising, and general effort. All performances are mandatory.

Students will be required to provide their own instrument or rent an instrument from a music store.

MU-CONCERT CHOIR 9-12

Prerequisite: None open to all students. Meets outside of timetable – mornings at 7:00am.

Performance course with students developing vocal skills using a variety of music predominantly choral idiom. Will explore jazz and other world choral music as well.

Assessment through class participation, attendance, concerts, assignments, performance testing, and general effort - all performances are mandatory.

MU-DRUMLINE 9/10

Prerequisite: Participation in another band/choral ensemble, or permission of instructor.

Meets outside the timetable – Mondays at lunch, Thursdays 2:45-4:30 p.m.

Recommended for all percussionist musicians both experienced and beginners.

"Step by step" approach to wide variety of techniques used in a contemporary drumline percussion ensemble.

Students receive instruction on snare drum, tenors, bass drum and cymbals.

Topics include: stick/mallet choices, grips, sound production, stroke techniques, dynamic control, proper warm-up routines, listening responsibilities and timing/balance.

Attention given to both the playing and marching aspects of this unique style of performance.

MU-DRUMLINE 11/12

Prerequisite: Participation in another band/choral ensemble, or permission of instructor.

Meets outside the timetable – Mondays at lunch, Thursdays 2:45-4:30 p.m.

Recommended for all percussionist musicians, both experienced and beginners.

"Step by step" approach to wide variety of techniques used in a contemporary drumline percussion ensemble.

Students receive instruction on snare drum, tenors, bass drum and cymbals.

Topics include: stick/mallet choices, grips, sound production, stroke techniques, dynamic control, proper

warm-up routines, listening responsibilities and timing/balance.

Attention given to both the playing and marching aspects of this unique style of performance.

MU-GUITAR 9-12

Prerequisite: None

Develop skills in chording, finger-picking and writing.

Attention given to theory and playing as an ensemble.

Will learn to play contemporary popular music.

Assessed through tests, performances and participation.

MU-JAZZ BAND 9/10

Prerequisite: Audition. Students enrolling in Jazz Band must also enroll in Concert Band. Meets outside of timetable – mornings at 7:00am

Provides students with the opportunity for artistic achievement and enrichment through the study and performance of high quality, challenging and stylistically diverse jazz music.

Creates an atmosphere of musical and personal growth through commitment to high standards of respect and cooperation for members of the ensemble, instructors, facilities, musical materials, and the rehearsal process.

Create improvisation solos in a performance setting, learn funk, fusion, swing, ballad rock, and other contemporary forms of jazz band and combo music. Jazz History is taught alongside performance skills.

Performances are mandatory. Students are required to provide own instrument or rent instrument from a music store.

MU-JAZZ BAND 11/12

Prerequisite: Audition. Students enrolling in Jazz Band must also enroll in Concert Band.

Provides students with the opportunity for artistic achievement and enrichment through the study and performance of high quality, challenging and stylistically diverse jazz music.

Creates an atmosphere of musical and personal growth through commitment to high standards of respect and cooperation for members of the ensemble, instructors, facilities, musical materials, and the rehearsal process.

Create improvisation solos in a performance setting, learn funk, fusion, swing, ballad rock, and other contemporary forms of jazz band and combo music. Jazz History is taught alongside performance skills.

Performances are mandatory. Students are required to provide own instrument or rent instrument from a music store.

MU-MUSIC COMPOSITION 10-12

Prerequisite: None

On-going writing of musical compositions and performances.

Includes theory, history, production of sound, arranging, ear training.

Making musical instruments.

Assessment through projects, assignments and performances.

MU-AP MUSIC THEORY 12

Prerequisite: None.

- AP Music Theory is for any student that wishes to take an advanced music theory and musicianship course. This course is similar to what first and second year students at university would take. Musicianship skills, including dictation and other listening skills, sight singing, and harmony are considered an important part of the course. Students will develop the ability to recognize, **understand**, and describe basic materials and processes of tonal music that are heard or presented in a variety of musical scores. Development of aural skills (ear training) is a primary objective. Performance is also part of the curriculum through the practice of sight singing and ear training. Students will understand basic concepts and terminology by listening to and analyzing a wide variety of music. Notational skills, speed, and fluency with basic music are also emphasized. There will be an AP exam at the end of this course.

MU-RECORDING ARTS 10-12

Prerequisite: None

- This course will provide a hands-on overview of the professional music industry and the ins and outs of recording with digital media.

Look at the development and evolution of recorded audio in society.

Emphasis on many aspects of music including musical composition and sound for motion pictures.

Using computer-based recording techniques, students will be taking a hands-on approach to music creation. Here each student will be able to produce their own recordings.

At the end of the course, students will have their own fully produced digital portfolio or EP.

MU-STRING ORCHESTRA 9-12

Prerequisite: At least one year of musical instruction required. Open to students from grades 9-12.

Designed to introduce students to the orchestral strings (violin, viola, cello, and double bass) and to enhance the skills of students who have previous experience with orchestral strings.

Assessment through attendance, class participation, performance tests, assignments, concerts, and general effort.

All performances are mandatory.

Students will be required to provide their own instrument or rent from a music store - a string rental night will occur in early Sept.

PERFORMING ARTS (PA)

PA-BROADCAST MEDIA PRODUCTION 11

Prerequisite: None. Open to students in Grades 10, 11, 12.

- Focus on the basic techniques of audio, video, lighting, as well as video production, and television broadcasting.

Students will apply the knowledge, skills, and attitudes gained from the course to produce videos and media broadcasts.

Students will use media based programs to produce some of their projects.

Evaluation on project work, production work, equipment management, and self- management.

PA-BROADCAST MEDIA PRODUCTION 12

Prerequisite: Film & Television 11 or Broadcast Media 11 recommended. Open to students in Grades 11 and 12.

Focus will be exploring areas of multimedia production, digital media, podcasts, storytelling, radio, and broadcast production.

Based on prerequisite course history, students will have choice in areas explored.

Select projects will allow students to work areas of media production.

Focus on hands-on and interactive learning situated in a rich spectrum of knowledge and skills.

Students will use media based programs to produce some of their projects.

Evaluation on project work, production work, equipment management, and self management.

PA-CHOREOGRAPHY 11/12

Prerequisite: Dance Foundations 11 / 12, and permission of instructor

Exploration of the elements of movement within choreographic structures.

Focus on kinesthetic and spatial awareness, and principles of design.

Describe, interpret, and analyze dance techniques and works using dance notation.

Learn techniques of effective lesson planning as well as procedures to prevent injury or harm to self and others.

Acquire and refine creative, collaborative, and leadership skills through practical teaching experiences both within the class and in other venues.

Note: This course runs independently within the Dance Foundations 9/10 or 11/12 classes. Course is individualized and requires the completion of a Dance Portfolio.

PA-DANCE FOUNDATIONS 9/10

Prerequisite: None. Open to students in grade 9.

Introduction to the elements of movement (body, space, time, dynamics, and relationships) and movement principles.

Introduction and progression through a variety of dance technique.

Interaction, reflection, and response to choreographic structures.

Introduction of historical, social, and traditional perspectives of dance.

Genres of performance pieces will vary semester to semester.

Projects and tasks will vary based on Dance Foundations 9 or 10.

Note: There is a mandatory final performance.

PA-DANCE FOUNDATIONS 11/12

Prerequisite: Dance Foundations 10 recommended.

Further exploration of the elements of movement (body, space, time, dynamics, and relationships) and movement principles.

Progression in technique and application of technique to choreography.

Interaction, reflection, and response to choreography structures, including a project with the goal of creating/learning choreography and teaching it to peers. Further exploration of historical, social, and traditional perspectives of dance.

Genres of performance pieces will vary semester to semester.

Projects and tasks will vary based on Dance Foundations 11 or 12.

Note: There is a mandatory final performance.

PA-DRAMA 9

Prerequisite: Previous drama an asset, but not required.

Exploring, scripting, characterization, mime, dance, improvisation, role playing, sense, story telling, choral speaking and more exploration.

Ongoing participation, written reflection, personal evaluation.

Evaluated on four unit projects – Acting and Performing.

PA-FILM & TELEVISION 9

Prerequisite: None

Focus on learning the basic techniques of video production.

Begin learning the essentials of video camera operation and storytelling.

Gain experience with non-linear editing systems and other media-based programs.

Basic techniques in lighting and sound for live performance will also be a focus.

A variety of assignments will reinforce these concepts so that the student's work becomes polished.

At appropriate times during the course, video and media concepts will be discussed and explored.

Evaluated on project work, assignments, equipment management, and self-management.

PA-FILM & TELEVISION 10

Prerequisite: Film & Television 9 recommended. Open to students in grade 10 and 11.

Student groups experience the whole process of film making (in front of & behind the camera), as they produce several short films.

Included is the original story concept, development of a treatment, storyboard and the script.

Pre-production looks at casting, blocking, shot lists, and the development of a rehearsal and shooting schedule, while addressing the logistics of locations, costumes and props.

Production involves directing, acting, and filming.

In post-production, video footage is logged and edit decisions lists (EDLs) created.

Everything comes together by way of computer based non-linear editing.

At appropriate times during the course, the use of the camera, and audio and lighting fundamentals are taught, along with screen language, and some basic acting techniques, so that the students are able to successfully film and deliver believable performances.

Evaluated on project work, tests, equipment management, and self-management.

PA-FILM & TELEVISION 11

Prerequisite: Film & Television 10 recommended. Open to students in grades 10 and 11.

Focus on exploring various genres of film and television.

Select stories to tell and develop within different genres

Develop treatments, storyboards, and scripts that illustrate student grasp of screen language, and the utilization of the artistic components of film and television.

After compiling a shot list and filming, students will use non-linear computer-based editing to produce their films.

Evaluation is on project work, production work, equipment management, and self-management.

PA-FILM & TELEVISION 12

Prerequisite: Film & Television 11 recommended. Open to students in grades 11 and 12.

Focus on exploring independent film.

Select stories to tell and develop for independent film.

Development of treatments, storyboards, and scripts that illustrate student's grasp of screen language and the utilization of the artistic components for independent film.

After compiling a shot list and filming, students will use non-linear computer-based editing to produce their film.

Evaluation is on project work, production work, equipment management, and self-management.

PA-THEATRE PRODUCTION 09

Prerequisite: None. Open to students in Grade 9.

Introduction to technical theatre.

Participation in all aspects of technical theatre (stage management, lighting design and operation, set design and construction, sound design, costume design and wardrobe management, makeup, properties construction and management, and stage crew responsibilities) working towards a major production.

Technical work on dance, theatre, music, and other school presentations is also expected.

Evaluation: 50% project work, test scores & assignment completion and 50% attitude (dependability, reliability & work habits).

PA-THEATRE PRODUCTION 10

Prerequisite: Theatre Production 9. Open to students in grades 10 and 11.

Participation in all aspects of technical theatre (stage management, lighting design and operation, set design and construction, sound design, costume design and wardrobe management, makeup, properties construction and management, and stage crew responsibilities) working towards a major production.

Technical work on dance, theatre, music, and other school presentations is also expected.

Evaluation: 50% project work, test scores & assignment completion and 50% attitude (dependability, reliability & work habits).

PA-THEATRE PRODUCTION 11

Prerequisite: Theatre Production 10 recommended. Open to students in grades 11 and 12.

A continuation of the drama support program established at the grade 10 level

Requirement: to develop a concentration in three or more of the following areas: stage management, lighting, sound, costume, makeup, set design, set construction, properties design & construction, stage crew, and wardrobe.

Evaluation: 50% project work, test scores & assignment completion and 50% for attitude (dependability, reliability & work habits).

PA-THEATRE PRODUCTION 12

Prerequisite: Theatre Production 11 recommended. Open to students in grades 11 and 12.

A continuation of the drama support program established at the grade 11 level.

Students will take on roles of management as they work with theatre production crews in the areas of technical theatre: set design and construction, properties, sound, lighting, costume, makeup, stage management, and tech crew.

Evaluation: 50% project work, test scores, and assignment completion; and 50% for attitude (dependability, reliability & work habits).

PA-THEATRE PRODUCTION 11/12: DIRECT/WRITE

Prerequisite: Previous performance course

The study, writing, and performance of student-written scripts.

Look at major playwrights through theatre history.

Students must be prepared to write, act, and direct.

PA-THEATRE PERFORMANCE 10-12

Prerequisite: Drama 9

Develop a deeper understanding of theatre arts through the study of theatrical skills of history and styles of acting.

Further emphasis on honing skills and tools needed to develop increased competency in acting and stage performance.

Helpful to students whose career choices will lead them to areas such as: Public Speaking, Journalism /Broadcasting, Publications, English Literature and Law.

Evaluation based on: learning the craft. (commitment, attendance in class and at rehearsals; practice learning lines, rehearsing, and character development; terms and definitions - learning and using terms related to acting and performance); knowledge acquisition (rehearsing, learning lines); and development and progress. Each term students' work will be assessed as to their progress in understanding and performance. Student journal (charting your own progress) 20%.

PA-MUSICAL THEATRE (OUT OF TIMETABLE) 9-12* BY AUDITION ONLY!

* This course exists outside of the timetable and will be added to your schedule after the audition process.

Prerequisite: By audition only - open to Grades 9-12. This is an advanced multi-art course for students who are interested in live musical theatre performance.

Audition Requirements:

- 1. Must be prepared to sing, dance and act**
- 2. Must prepare a one-minute monologue**

Audition: T.B.A. - Please contact Ms. Guy for appointment at alison_guy@sd33.bc.ca BEFORE May 1st.

- Learn acting, singing, dancing and/or movement as it applies to the year's major musical production
- In addition to rehearsing the production, students may be expected to do two or three reading and writing assignments and a term project. Evaluation: performance and rehearsal commitment.
- A daily after school class during Semester 1.
- This course will be added to the student's timetable following the audition phase in late spring.

PHYSICAL AND HEALTH EDUCATION (PHE)

PHE-PHYSICAL & HEALTH EDUCATION 9

Prerequisite: Physical Education 8

As an extension of PHE 8, students will:

Develop an understanding of how lifelong participation in physical activity has many benefits and is an essential part of a healthy lifestyle.

Develop an understanding how healthy choices influence our physical, emotional, and mental well-being.

Participate in a variety of activities that will promote lifelong participation in physical activity.

Be evaluated on fitness, skills, effort, and participation. Active participation is required for all students.

PHE-PHYSICAL & HEALTH EDUCATION 9 - ALTERNATE DELIVERY

Prerequisite: Physical Education 8

This course is designed to help those students receive PE 09 credit that would normally choose a Distance Education route.

Designed to assist in the development of physical fitness skills and knowledge to pursue a healthy lifestyle in a classroom setting.

Designed to deliver Mental Health Literacy Education Curriculum

Students will research & report on aspects of physical fitness to include but not limited to nutrition, psychology and conditioning.

Students will be required to maintain a weekly activity log.

The course involves students developing individualized goals and demonstrate knowledge and implement a training program.

PHE-PHYSICAL & HEALTH EDUCATION 10

Prerequisite: Physical Education 09

As an extension of PHE 9, students will:

Develop an understanding of how lifelong participation in physical activity has many benefits and is an essential part of a healthy lifestyle.

Develop an understanding how healthy choices influence our physical, emotional, and mental well-being.

Participate in a variety of activities that will promote lifelong participation in physical activity.

Be evaluated on fitness, skills, effort, and participation. Active participation is required for all students.

PHE-PHYSICAL & HEALTH EDUCATION 10 - ALTERNATE DELIVERY

This course is designed to help those students receive PE 10 credit that would normally choose a Distance Education route.

Designed to assist in the development of physical fitness skills and knowledge to pursue a healthy lifestyle in a classroom setting.

Students will research & report on aspects of physical fitness to include but not limited to nutrition, psychology and conditioning.

Student will receive basic First Aid training. Students will be required to maintain a weekly activity log.

The course involves students developing individualized goals and demonstrate knowledge and implement a training program.

This course does not count as a prerequisite to PHE 11

PHE-PHYSICAL & HEALTH EDUCATION 10 - HEALTH & FITNESS FOCUS

Prerequisite: Physical & Health Education 09

This class meets in the Fitness/Dance Studio.

Students will participate in daily activity covering all the key components of a balanced fitness program (cardiovascular, muscular endurance, strength and flexibility.)

Students will be exposed to a variety of fitness classes (Strength, dance/Zumba fitness, step aerobics, kickboxing, boot camp, Pilates, yoga and more). All fitness levels are welcome.

Students will learn how healthy choices influence and are influenced by: their physical, emotional, and mental well-being and will set goals to achieve.

Students will develop skills and knowledge to maintain a healthy active lifestyle beyond graduation.

Students will receive credit for PE10, which fulfills one of their graduation requirements.

PHE-HEALTH & FITNESS 11

Prerequisite: Physical and Health Education 10

This class meets in the Fitness/Dance Studio.

Students will participate in daily physical activity covering all the key components of a balanced fitness program (cardiovascular, muscular endurance, strength and flexibility.)

Students will learn proper/safe techniques for all strength training exercises using a variety of equipment and exercise styles.

Students will participate in a variety of fitness classes (Strength, dance/Zumba fitness, step aerobics, kickboxing, boot camp, Pilates, yoga and more). All fitness levels welcome.

Students will learn how personal choices influence their health and fitness goals.

Students will develop skills and knowledge to maintain a healthy active lifestyle beyond graduation.

Students will fulfill the requirements for a PE11 credit.

PHE-HEALTH & FITNESS 12

Prerequisite: Physical and Health Education 11

Combines daily physical activity covering all the key components of a balanced fitness program (cardiovascular, muscular endurance, strength and flexibility).

Students will participate in a variety of fitness classes (Strength, dance/Zumba fitness, step aerobics, kickboxing, boot camp, Pilates, yoga and more). All fitness levels welcome.

Students will learn proper/safe techniques for all strength training exercises using a variety of equipment and exercise styles.

Students will learn how personal choices influence their health and fitness goals.

Students will develop skills and knowledge to maintain a healthy active lifestyle beyond graduation.

Students will fulfill the requirements for a PE12 credit.

PHE-HEALTH SERVICES 11

Prerequisite: Physical Education 10

A practical course for students interested in any Health Services job (from doctor to fitness trainer to firefighter).

Topics include resuscitation, first aid, fitness theory, sports injuries, different environments, and introduction to professions.

Certification in CPR 'C' and SFA is available within the course; and materials from athletic taping, sports first aid, concussion management and fitness theory are covered.

PHE-HEALTH SERVICES 12A/HEALTH SERVICES 12B

Prerequisite: Application *There is a fee for this course

This program gives students the opportunity to achieve the **Emergency Medical Responder** (EMR) certification in partnership with the Justice Institute of BC. Assessment will follow Justice Institute criteria including written exams, practical exams, and attendance.

In the one block of timetable students must take **both** HS12A and HS12B (Independent Study Course) concurrently to prepare for the written exam. This online course is worth a full course credit in addition to the practical material in class.

The Emergency Medical Responder certification is a qualification necessary for Paramedics, recommended for Firefighters, and helpful for anyone looking to enter a Medical Profession. A separate government-licensing exam is required if going directly to the workforce with this qualification.

PHE-ACTIVE LIVING 11

Prerequisite: A passing grade in Physical & Health Education 10

- This course will emphasize the preparation for an active and healthy lifestyle after students leave school. Students will participate and develop skills in a variety of physical activities that have the potential for lifelong involvement.
- LIFETIME SPORTS AND LEISURE ACTIVITIES are the MAJOR FOCUS.
- The course will consist of activities which use both school and community facilities. The choice of activities will be made by individual classes from the following options: Ice skating, curling, hiking, bowling, racquet ball, badminton, basketball, ultimate frisbee, volleyball, aerobics, minor games, and racquet sports, and many community-centered leisure activities.
- Students will have input into what activities they would like to see in class. Evaluation is based on activities and criteria developed from the learning outcomes as stated in the provincial core P.E. curriculum.
- This course is ideal for the PE student who is not interested in sport specific classes (PHE SOCCER/BASKETBALL) or students who are not interested in Strength and Conditioning or to select both a specific PE course along with Active Living.

PHE-ACTIVE LIVING 12

Prerequisite: A passing grade in Active Living 11

- This course will emphasize the preparation for an active and healthy lifestyle after students leave school. Students will participate and develop skills in a variety of physical activities that have the potential for lifelong involvement.
- LIFETIME SPORTS AND LEISURE ACTIVITIES are the MAJOR FOCUS.
- The course will consist of activities which use both school and community facilities. The choice of activities will be made by individual classes from the following options: Ice skating, curling, hiking, bowling, racquet ball, badminton, basketball, ultimate frisbee, volleyball, aerobics, minor games, and racquet sports, and many community-centered leisure activities.
- Students will have input into what activities they would like to see in class. Evaluation is based on activities and criteria developed from the learning outcomes as stated in the provincial core P.E. curriculum.
- This course is ideal for the PE student who is not interested in sport specific classes (PHE SOCCER/BASKETBALL) or students who are not interested in Strength and Conditioning or to select both a specific PE course along with Active Living.

PHE-STRENGTH & CONDITIONING 11/12

Prerequisite: A 'B' grade in the previous Physical Education course and a high level of personal motivation. Grade 10 students may take this course based on Teacher permission.

Designed to prepare students to achieve short term strength & conditioning goals as part of a lifelong active lifestyle. This course involves students in developing individualized goals and implementing the training program to succeed.

Evaluation: Training program development 25%;
Training journal entries 25%; Practical participation 50%.

PHE-STRENGTH & CONDITIONING 11/12 (AM)

Prerequisite: A 'B' grade in the previous Physical Education course and a high level of personal motivation. Grade 10 students may take this course based on Teacher permission.

THIS CLASS RUNS EVERY OTHER DAY, FROM 7AM to 8:10AM

See Strength & Conditioning description above.

This option is for elite athletes that want to add to their current training program OR students that are committed to a healthy, active lifestyle, but due to timetable restraints are not able to schedule it into their regular course load.

PHE-STRENGTH & CONDITIONING 11/12 (PM)

Prerequisite: A 'B' grade in the previous Physical Education course and a high level of personal motivation. Grade 10 students may take this course based on Teacher permission.

THIS CLASS RUNS EVERY OTHER DAY, FROM 2:50PM to 4PM. If students are involved in other after school activities, this course would need to take priority in their scheduling.

See Strength and Conditioning AM description.

This option is for elite athletes that want to add to their current training program OR students that are committed to a healthy, active lifestyle, but due to timetable restraints are not able to schedule it into their regular course load.

PHE-SWIMMING AND LIFESAVING 11

Prerequisite: Application Required - Swimming Proficiency is required - Students must be able to swim 400m continuously (with a recognizable stroke) or be able to swim 100m continuously in less than 3 minutes prior to taking the course.

The course will include a variety of Aquatic activities (swimming, water polo, water rescue, other). This is a pre-employment program in partnership with the YMCA. Throughout the duration of the course, students will be given instruction towards attaining their Bronze Medallion, Bronze Cross, and Standard First Aid certifications (if they don't already have them). These are all of the prerequisites for the National Lifeguard course. There is a total certification fee of up to \$125 (if all certifications are needed/successful). The course will start at 7:00am at Cheam Leisure Centre every other day (day 1 or day 2) and will end at 9:30am so that students can get back to school for block 2.

PHE-PHE LEADERSHIP 9-12

Prerequisite: A "B" grade or higher in previous Physical Education Courses. Open to students in grades 9 through 12. Application required.

- Designed to introduce and involve students interested in coaching, sports administration, minor officiating, and careers in the athletic and recreational disciplines.
- Promotes leadership as it relates to leisure activities and athletics.
- Group activities include: team-building activities, PE (including fitness, soccer, basketball, volleyball, baseball, floor hockey, minor games, etc.) and the introduction of community-based activities (curling, skating, swimming, etc.)
- Students are provided with the opportunity to organize special events, such as the Terry Fox Run, pep rallies, Alumni Basketball Game, Strong Man Competition, gym blasts, Intramurals, and more.
- Students will participate in: daily physical activity, planning special school events, intramurals, and coaching & teaching.
- Students will be required to engage in some activities outside of class time to meet all requirements.

PHE-PHE BASKETBALL 9-10

Prerequisite: Designed for motivated athletes in grade 9 and 10.

PHE Basketball 9 fulfills the prescribed learning requirements for Physical Education 9.

Designed for motivated athletes in grade 9 who wish to continue their passion of basketball by focusing on a training regime through a sport specific program.

This course will assist students in building Basketball specific skills such as: individual skills, team formations, and tactical awareness. Supplemented with plyometric, sport specific weight training, agility and core training, aerobic and anaerobic training.

PHE Basketball 10 fulfills the prescribed graduation requirement for PHE 10.

PHE-PHE BASKETBALL 11-12

Prerequisite: Designed for motivated athletes in grades 11-12.

PHE 11-12 Basketball fulfills the prescribed learning requirements for Physical Education 11-12.

Designed for motivated athletes in grades 11-12 who wish to continue their passion of basketball by focusing on a training regime through a sport specific program.

This course will assist students in building Basketball specific skills such as: individual skills, team formations, and tactical awareness. Supplemented with plyometric, sport specific weight training, agility and core training, aerobic and anaerobic training.

PHE-PHE BASKETBALL 9-10 FEMALE

Prerequisite: Designed for motivated female athletes in grade 9 and 10.

PHE Basketball 9 and 10 fulfills the prescribed learning requirements for Physical Education 9.

PHE Basketball 10 fulfills the prescribed graduation requirement for PHE 10.

Designed for motivated female athletes in grade 9 and 10 who wish to continue their passion of basketball by focusing on a training regime through a sport specific program.

This course will assist students in building Basketball specific skills such as: individual skills, team formations, and tactical awareness. Supplemented with plyometric, sport specific weight training, agility and core training, aerobic and anaerobic training.

PHE-PHE FOOTBALL 9-12

Prerequisite: Designed for motivated athletes in grades 9-12.

This course will focus on football specific training. Previous football experience is not required. The course will focus on skill development (catching, throwing, stance, footwork, punt, kick), improvement in agility, positional play, fitness, goal setting, understanding of high school football rules, sportsmanship, and daily participation. This course will also briefly introduce proper weight training lifts and exercises. Students who are interested in this course should be self-motivated and should be prepared to train outside.

PHE-PHE SOCCER 9-12

- **Prerequisite:** Open to students in grades 9-12.
- PHE Soccer 10 fulfills the prescribed graduation requirement for Physical Education 10.
- Designed for all levels of athlete in grades 9-12 who wish to continue their training regime through a sport-specific program.
- This course will assist students in building soccer specific skills such as: individual skills, team formations, and tactical awareness. Supplemented with plyometric, sport specific weight training, agility and core training, aerobic and anaerobic training.

PHE-PHE VOLLEYBALL 9-12

Prerequisite: Designed for motivated athletes in grades 9-12.

PHE 9-12 Volleyball fulfills the prescribed learning requirements for Physical Education 9-12.

PHE Volleyball 10 fulfills the prescribed graduation requirement for PHE 10.

Designed for motivated athletes in grades 9 -12 who wish to continue their passion of Volleyball by focusing on a training regime through a sport specific program.

This course will assist students in building Volleyball specific skills such as: individual skills, team formations, and tactical awareness. Supplemented with plyometric, sport specific weight training, agility and core training, aerobic and anaerobic training.

Hockey Academy

PHE-PHE HOCKEY SKILLS 9-12 / PHE-PHE HOCKEY THEORY 9-12 (2 COURSES TO SELECT, 2 BLOCKS IN TIMETABLE)

Prerequisite: Application & Tuition Fee. Open to students in grades 9 through 12.

Hockey skills development program is for students who have a passion for hockey. This is a linear program; students will participate in three on-ice and two off-ice development sessions per week from September – June.

Skill development and hockey specific training (on and off ice) include: individual (stick, possession, passing, power skating, shooting, checking) and team (play, transition, special teams) hockey offensive and defensive skills; agility; balance; cardio; muscular strength and endurance; nutrition; and leadership.

Academic support and learning style assessment components of the program.

Viable post-secondary planning: including NCAA Division I & II, CIS, Canadian College.

Head Coach: Jeff Grenier

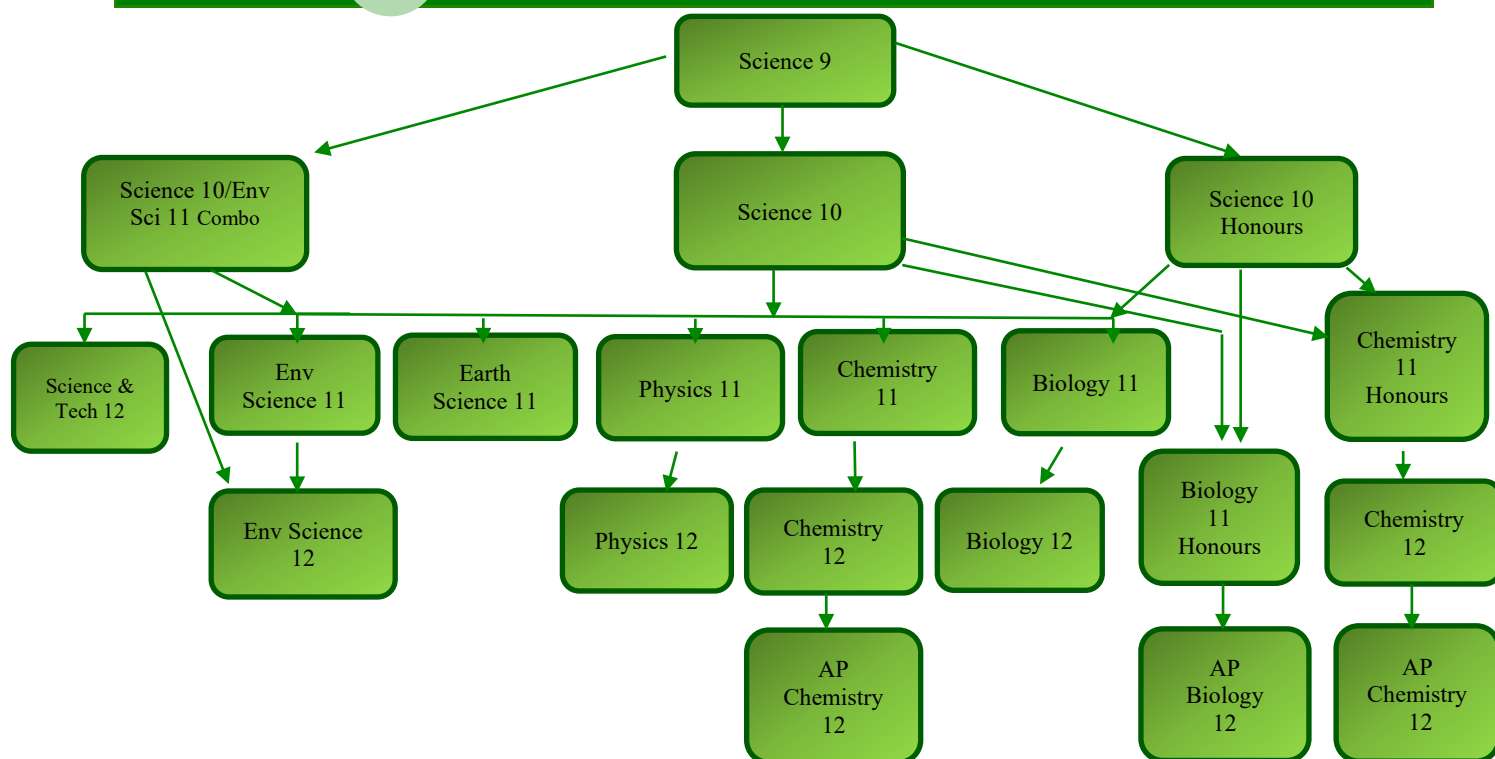

Application for download at [**https://sardissecondary.sd33.bc.ca/course-planning**](https://sardissecondary.sd33.bc.ca/course-planning)

PHE 10 course requirements will be met with successful completion of the program.

Students will demonstrate athletic, academic and personal growth.

SCIENCE (SC)

SC-SCIENCE 9

Prerequisite: Science 8

Big Ideas:

Cells are derived from cells.

The electron arrangement of atoms impacts their chemical nature.

Electric current is the flow of electric charge.

The biosphere, geosphere, hydrosphere, and atmosphere are interconnected, as matter cycles and energy flows through them.

Typical activities: lectures, projects, demonstrations, and labs.

SC-SCIENCE 10

Prerequisite: Science 9

Core topics: Processes of Science, Genetics, Chemical Processes, Energy, Formation of the Universe

Typical activities: lectures, projects, demonstrations, and labs

Prepares students for continued studies in one or more of the grade 11 science options

Assessment: Content and curricular competencies will be assessed based on a combination of assignments (labs/projects), quizzes, tests and a comprehensive Final Exam at the end of the course.

SC-SCIENCE 10/AGRICULTURE 11 (ENVIRONMENTAL SCIENCE) (DOUBLE BLOCK)

Combo course – 2 concurrent blocks in the timetable. Students will receive credit for both their Science 10 and Science 11 graduation requirements.

Science 10 Prerequisite: Science 9 and a willingness to participate in outdoor activities. Students will spend a considerable number of classes at the school farm and should be prepared to walk there and back from the school or arrange their own rides.

- Students will get credit for completing Science 10 because we will learn about DNA/genetics, chemical processes, conservation of energy and Big Bang Theory.
- Since this course is taught with Agriculture 11, there will be a large emphasis on how agricultural practices are affected by the concepts learned in Science 10
- Students must be willing to do hands-on, physical labour at our school farm and in our school greenhouse. Duties will include digging, weeding, planting, harvesting, wheel-barrowing, lawn mowing, pruning, composting, watering, chicken care and more.
- In addition to the outdoor learning component, students will also be expected to complete labs, assignments, quizzes and tests.

Agriculture 11 Prerequisite: Willingness to participate in activities outside of the classroom, including physical labour at the school farm and the school greenhouse.

- General introduction to modern agriculture in B.C., concentrating on local agriculture in the Fraser Valley.
- Topics include greenhouse horticulture, sustainable gardening, various agriculture commodities (dairy, poultry, etc), fisheries, forestry, wildlife conservation.
- Activities are lectures, labs, project work (hands-on work in the greenhouse, barn and school farm), field trips and guest speakers

SC-SCIENCE 10 HONOURS

Prerequisite: Science 9. Students will be selected for admission based upon effort and achievement in Science 9.

Core topics: Processes of Science, Genetics, Chemical Processes, Energy, Formation of the Universe.

Expanded Honours Topics: Honours students will cover more advanced topics in each of the sections of Science 10 in addition to numerous enrichment activities such as field trips and guest speakers.

Typical activities: laboratory experiments, lectures, demonstrations, assignments, field trips and guest speakers.

Assessment: Content and curricular competencies will be assessed based on a combination of assignments (labs/projects), quizzes, tests and a comprehensive Final Exam at the end of the course.

SC-SPECIALIZED SCIENCE 12 (SCIENCE AND TECHNOLOGY)

Prerequisite: Science 10 or teacher permission

This course is designed to be practical, hands-on and a fun approach to Science with theory components.

Range of students varies: those that struggled with Sc. 10, like to build things, and/or wish to increase their knowledge.

Much of the time will be used to design, build and test self-constructed prototypes so students have to be willing to learn how to use different tools and materials.

Content: Technology, Space, Transportation & Forensics.

SC-AGRICULTURE 11 (ENVIRONMENTAL SCIENCE)

Prerequisite: Science 10 or teacher recommendation.

This course is designed to teach concepts around food production using hands-on methods, primarily at the school greenhouse. Students will learn skills in growing food in the SSS Greenhouse (peppers, tomatoes, cucumbers), growing field crops at the SSS Farm, and growing flowers in the SSS Greenhouse. Students will also learn about animal agriculture through field trips and guest speakers. Students can expect roughly 50% theory and 50% doing hands-on activities in the greenhouse or at the farm. Topics will include the sustainability of agriculture, forestry and fisheries in BC.

SC-AGRICULTURE 12 (ENVIRONMENTAL SCIENCE)

Prerequisite: Science 10 or teacher recommendation. Agriculture 11 or summer program must be completed before Agriculture 12.

This course is an extension of Agriculture 11. Students will be given greater responsibility in managing aspects of the SSS Greenhouse and the SSS Farm. They will be included in crop planning, managing sales of produce, and spend time learning about current global issues in the world of agriculture and food production. As in Agriculture 11, a large component of this class will be learning through hands-on methods that complement the theory learned in class.

SC-AGRICULTURE 12/SPECIALIZED SCIENCE 12 (DOUBLE BLOCK)

This course will be offered over both morning blocks for the entire semester, allowing students to complete 2 grade 12 courses and a first year UFV Agriculture course (subject to approval). This course is created for students who have a passion for agriculture and who have excelled in Ag 11 or the summer agriculture program. Students will spend a large component of their time at the SSS Farm planning, implementing and managing crops and working on the CSA program offered by the Ag program. Students will do a project that coincides with their passions in agriculture in either: pest management, crop planning, or the business of agriculture.

SC-APPLIED BIOLOGY (DOUBLE BLOCK- BIOLOGY 11/ENVIRONMENTAL SCIENCE 11)

Prerequisite: Science 10

This is a back-to-back course of Biology 11 and Environmental Science 11, earning 8 graduation credits upon completion. We will explore all of the organisms on the planet, how they interact and how humans impact them changing the world around us. The hands-on component of the course includes dissections, sustainable agriculture and forestry applications such as Integrated Pest Management. This course can act as a prerequisite to both Biology 12 and Environmental Studies 12.

SC-BIOLOGY 11 - LIFE SCIENCES

Prerequisite: Recommended Science 10 (with a C or higher recommended)

Survey course of the 5 Kingdoms found in nature, viruses & bacteria, classification and evolution. Lab based course with labs worth 25% of the course. Weighting may vary by teacher.

Dissection of earthworms, crayfish, frogs, and others.

Evaluation is based on tests, labs, assignments and a final exam. (Weightings will vary by teacher)

SC-BIOLOGY 11 HONOURS (AP BIOLOGY PART 1)

Prerequisite: Science 10 Honours (with B or higher recommended), or Science 10 with teacher recommendation.

Expect demanding course content and to enroll in AP Biology the following year. The content of this course will continue in AP Biology.

Core Topics: genetic makeup of populations; growth, reproduction, and maintenance of living systems; processing of genetic information, nutrient cycles, origin of living systems in nature.

Typical activities: Laboratory experiments, lectures, and assignments.

Evaluation: Based on tests, quizzes and labs. (Weightings will vary by teacher) This course will have a final, comprehensive exam.

SC-BIOLOGY 12 - ANATOMY & PHYSIOLOGY

Prerequisite: Biology 11 (with a C+ or higher recommended)

Topics include Human Anatomy/Physiology (Digestion, Cardiovascular, Respiratory, Urinary, Nervous, & Reproduction), Cytology, Biochemistry, and Protein Synthesis.

Evaluation is based on tests/quizzes and assignments and a comprehensive final exam. (Weightings will vary by teacher) Students should have strong reading and comprehension skills.

SC-AP BIOLOGY 12

Prerequisite: Honours Biology 11 (with a C+ or higher is recommended).

Designed to be equivalent to a first year college general biology course.

Contributes to development of a student's abilities to think clearly and express ideas orally and in writing, with clarity and logic.

Course is a continuation of Honours Biology 11.

Content: Feedback mechanisms; growth and homeostasis; cellular and molecular mechanisms; transmission of information between biological systems.

Typical Activities: Laboratory experiments, lectures, and assignments.

Evaluation: Based on tests, quizzes and labs. (Weightings will vary by teacher) This course will have a final, comprehensive exam. Optional AP Exam - costs will be required.

SC-CHEMISTRY 11

Prerequisite: Science 10 and Foundations of Math & Pre-Calculus 10 (with a C+ average or higher recommended) Recommended that Pre-Calculus 11 be taken concurrently with this course. Course content is demanding.

Core Topics: Atoms and Molecules; The Mole; Chemical Reactions; Solution Chemistry; Introduction to Organic Chemistry.

Typical Activities: In-class activities, laboratory experiments, lectures, demonstrations, and assignments.

Evaluation: Based on tests, quizzes and labs. (Weightings will vary by teacher) This course will have a final, comprehensive exam.

SC-CHEMISTRY 11 HONOURS

Prerequisite: Science 10 Honours & Foundations of Math and Pre-Calculus 10 (with a B average or higher recommended), or Science 10 teacher recommendation.

Recommended that Pre-Calculus 11 be taken concurrently.

Expect demanding course content and to enroll in AP Chemistry 12 the following year.

Core Topics: Atoms and Molecules; The Mole; Chemical Reactions; Solution Chemistry; Introduction to Organic Chemistry.

Expanded Topics: Quantum Numbers; Molecular Geometry; Chemistry of Transition Metals; Complex Ions.

Typical Activities: In-class activities, laboratory experiments, lectures, demonstrations, and assignments.

Evaluation is based on homework quizzes, labs, projects, tests and a comprehensive final exam. (Weightings will vary by teacher)

SC-CHEMISTRY 12

Prerequisite: Chemistry 11 with a C+ average or higher. Chemistry 11 (with a C+ or higher is recommended)

The course has a heavy mathematical basis and therefore requires an average of C+ or higher in Pre-Calculus 11. Students are also advised to take Pre-Calculus 12 or Foundations of Mathematics 12.

Topics: Reaction Kinetics; Equilibrium; Solubility of Ionic Substances; Acids, Bases, and Salts; Electrochemistry.

Typical Activities: In-class activities, laboratory experiments, lectures, demonstrations and assignments. Evaluation is based on homework quizzes, labs, projects, tests and a final exam.

SC-AP CHEMISTRY 12

Prerequisite: Honours Chemistry 11, Chemistry 12 (may be taken concurrently), and Pre-Calculus 11 (with a C+ average or higher is recommended)

Designed to be equivalent to a first-year university general chemistry course.

Contributes to development of a student's abilities to think clearly & express ideas orally & in writing, with clarity and logic.

Review Topics: Matter & Measurements; Atoms, Molecules, & Ions; Chemical Formulas and Equations; Electronic Structure; The Periodic Table and the Main Group Metals; Covalent Bonding; Liquids and Solids; Organic Chemistry; Quantum Numbers; Molecular Geometry; Chemistry of Transition Metals; Complex Ions; Nuclear Chemistry.

Expanded AP Topics: Kinetics & Thermochemistry; Gas Laws & Gaseous Equilibrium; Qualitative Analysis; Non-metals; Molecular Structure; Liquids and Solids.

Typical Activities: In-class activities, laboratory experiments, lectures, demonstrations, and assignments.

Evaluation is based on homework quizzes, labs, projects, tests and a final exam. (Weightings will vary by teacher). Optional AP Exam – exam costs will be required.

SC-EARTH SCIENCE 11

Prerequisite: Science 10

- Course content: Geology (Rocks, Minerals, Resources, Plate tectonics, Earthquakes & Volcanoes) Meteorology / Oceanography (Atmosphere, Hydrosphere & Climate change) Astronomy (Solar System, Stars & Technology).
- Activities / Assessment: Labs, Projects, Virtual field trips, Interactive activities & presentations.

SC-PHYSICS 11

Prerequisites: Science 10 and Foundations Math 10 (with a C+ or greater is recommended)

- Recommended that Pre-Calculus 11 be taken concurrently with this course. Course content is demanding.
- Course content includes motion graphs, vectors, kinematics, forces, energy, waves, and electric circuits.
- Typical activities include lecture, labs, projects, demonstrations, and experiments.
- Learning projects may include building medieval trebuchets or egg drop survival mission.
- Evaluation is based on homework quizzes, labs, projects, and tests.
- Students need to be proficient in mathematics, especially algebra.
- Evaluation is based on homework quizzes, labs, projects, tests, and a final exam. (Weightings will vary by teacher)

SC-PHYSICS 12

Prerequisites: Physics 11 and Pre-Calculus Math 11 (with a C+ or greater is recommended)

- Course content includes special relativity, forces, circular motion, energy, momentum, torque, static electricity, magnetism, and induction.
- Course content is demanding so the level of work ethic needs to be high.
- Typical activities include lecture, labs, projects, demonstrations, and experiments.
- Evaluation is based on homework quizzes, labs, projects, and tests.
- Students should be proficient in mathematics and have achieved at least a C+ in Physics 11 & Math 11.
- Evaluation is based on homework quizzes, labs, projects, tests, and a final exam. (Weightings will vary by teacher)

SOCIAL STUDIES (SS)

SS-SOCIAL STUDIES 9

Prerequisite: Humanities 8 or Social Studies 8

Social Studies 9 is a required course and will include content from 1750-1914.

Students will inquire about how emerging ideas and ideologies profoundly influence societies and events; the physical environment influences the nature of political, social, and economic change; and disparities in power alter the balance of relationships between individuals and between societies.

SS-SOCIAL STUDIES 10

Prerequisite: Humanities 9 or Social Studies 9

Social Studies 10 is a required course for graduation.

The area of focus is on Canada and the World from 1914 to present.

Major themes: Global and Regional Conflicts, The development of Political Institutions, World Views and different perspectives, Historical and Contemporary Injustices.

SS-20TH CENTURY WORLD HISTORY 12

Prerequisite: Social Studies 10

This course addresses critical events and movements from the 20th century that have shaped our world. We will develop an understanding of the political and social currents of today through an analysis of historical events, primary and secondary sources, documentary film and historical fiction. Topics include:

- Major global conflicts such as the conclusion of World War I, World War II and the Cold War
- Civil wars, independence movements and revolution
- Religious, ethnic/cultural conflicts, genocide, and democide
- Various political, ideological, and social movements which can include feminism, civil rights, democracy, communism, and fascism.
- The rapid development and proliferation of technology

SS-BC FIRST PEOPLES 12

Prerequisite: Social Studies 10

Interconnection of family relationships, language, culture and the land (story, oral tradition, culture, economics, etc.)

Factors that challenge the identity and views of indigenous people.

The resilience and survival of indigenous peoples through colonialism.

Community and economic development.

Explore relationships and policies with governments across the globe (Indian Act, Aboriginal Acts, Exclusion Acts, Residential Schools and Reconciliation, etc.)

Treaty relations (historical and contemporary).

Political Activism - - the resistance of BC First Peoples from colonialism through the early 21st Century.

Role and significance of media in challenging and supporting the continuity of culture, language, and self-determination.

Commonalities and differences between traditional and contemporary BC First Peoples governance systems.

Impact of historical exchanges of ideas, practices, and materials among local BC First Peoples and with non-indigenous peoples.

Provincial and federal governmental policies and practices that have affected, and continue to affect, BC First Peoples responses to colonialism.

SS-COMPARATIVE CULTURES 12

Prerequisite: Social Studies 10.

- This course will focus on several different cultures and their contributions to the modern world.
- Partly a project-based course, students will examine various cultures globally and *specialize* in one or more of the following areas: Art and Architecture, Literature, Military and Political Studies, Society and Culture, Technology, Philosophy and Religion.
- Areas of study will include Ancient Egypt, Greece, Rome, Africa, India, China, Maya, and the Islamic World.

SS-CONTEMPORARY INDIGENOUS STUDIES 12

Prerequisite: Social Studies 10.

- This course examines the identities and world views of Indigenous peoples throughout the world, specifically in BC.
- Topics include resilience and survival in the face of colonialism; responses to inequalities in Canada and around the world; and the interconnection of relationships, culture, and land.
- This course will directly confront the question of how to restore balance through healing and reconciliation.
- Successful completion of this course meets the graduation requirement for Indigenous-Focused coursework.

SS-HUMAN GEOGRAPHY 12

Prerequisite: Social Studies 10

Explore how humans interact with the world in terms of space and place.

Study many fields including culture, religions, the economy, urbanization, and politics.

Look at population sizes and locations and why people settle where they do.

SS-LAW 12

Prerequisite: Social Studies 10

Origins of Canadian law, our legal system, courts, Charter of Rights and Freedoms, business law and current issues in our society.

Guest speakers, such as local politicians and lawyers; field trip to Supreme Court as well as Provincial Courthouse.

Students will be evaluated on quizzes, tests, written work, projects, and participation in class activities.

SS-PHILOSOPHY 12

Prerequisite: Social Studies 10

An Excellent course for students moving on to college or university as well as for those intending to work.

Provides tools for investigating meaning and fostering understanding of different ways of thinking. Examining questions in philosophy allows people to question their assumptions and better understand their own beliefs. This course will use various resources to examine and evaluate the differing perspectives people have regarding essential questions of truth, reality, and existence. Examines the larger questions of life including what is: reality, right & wrong, thought, art, beauty, and more.

Through lectures, movies and discussions we trace the history of western thought – from Socrates until we reach postmodern thinking of present day; topics cover the nature of right action, knowledge and consciousness.

Attention given to exploring individual worldviews, underlying reasoning behind them, & the nature & structure of modern society.

SS-POLITICAL STUDIES 12

Prerequisite: Social Studies 10.

Explore the power relationships between citizens, government, and other bodies in the creation of public policy.

Throughout the course, students will examine the structure and function of Canadian and First Peoples political institutions; major ideologies and political systems; and our election processes and electoral systems.

SS-SOCIAL JUSTICE 12

Prerequisite: Social Studies 10

Uses a variety of interpretations and concepts of Social Justice.

Includes issues such as equality, ethics and social responsibility.

Other areas of inquiry include connections between Politics, Government, and Religion on past and present Social Justice Issues in Canada and the world.

This class also looks at issues of poverty, race, and other marginalized groups.

STUDENT SERVICES (ST)

INCLUSIVE EDUCATION: Inclusive Education classes refers to education placement with support, as per individual education needs. The main focus of these classes are functional literacy, numeracy, and life skills.

INDIGENOUS STUDENT SUPPORT Indigenous Student Support is available as an additional service to students who self-identify as Indigenous. Members of our Indigenous Student Support Team use C111 as their home base and can be accessed before school, at lunch or after school.

ST-ENGLISH LANGUAGE ACQUISITION 9-12

This program welcomes any student who has *a language in addition to English in the home*; this includes Canadian citizens, Permanent Residents, temporary residents and International students. Grade 10, 11 and 12 courses earn students 4 credits each towards graduation (up to 12 credits).

These courses help English as an Additional Language students improve proficiency in the English language, facilitating student success in language-based high school courses.

Students receive academic support for their subject classes; they practice skills and strategies to increase competency in and command of the English language.

Students will investigate and express understanding of diverse cultural customs, including those of Canada.

Students make connections with peers, staff and the larger community; assistance is provided to connect through social events, clubs, sports, community programs as well as volunteering, job search and post-secondary applications.

ST-LEARNING ASSISTANCE/STRATEGIES 10-12

Prerequisite: Special placement by Inclusive Education Teacher and/or School Based Team (SBT)

These 4 credit courses can be used toward the total credits necessary for graduation.

Provides academic subject support.

Identifies personal learning styles and practices strategies to support Student Learning Profiles.

Develops and increases self-advocacy skills.

ST-LAR 9-12 (LEARNING ASSISTANCE REMEDIAL)

Prerequisite: Special placement by Inclusive Education Teacher and/or School Based Team (SBT)

Provides remedial instruction in core academic areas (humanities and mathematics).

Provides homework subject support.

Develops and increases personal, life, and work-related skills.

Facilitates appropriate work experience opportunities.

ST- PERSONAL DEVELOPMENT 9-12 (STUDENTSHIP & SOCIAL SKILLS)

Prerequisite: Special placement by Inclusive Education Teacher and/or School Based Team (SBT)

This course is designed for students to identify and develop strategies for executive functioning, goal setting, emotional management, and self-regulation.

ST-GUIDED LEARNING 12

Prerequisite: Open to Grade 12 students only. Must have a minimum of a "B" average in grade 11 and 4 or more academic courses, with 3 in the semester of the GL block. Application and teacher reference required.

Guided learning is a block designed for dedicated, hardworking students who are preparing for post-secondary opportunities. Students must be able to work independently and be striving towards excellence in academics. Students can use this time to meet with their counsellor and/or our career advisor to review graduation plans and university entrance requirements. Students can also work on university and scholarship applications. In addition, GL students will complete required activities as outlined on the GL package and hand it in to the principal.

TECHNOLOGY EDUCATION (TE)

TE-POWER TECHNOLOGY 9

Prerequisite: None

Learn about principles of flight including lift, thrust, and aerodynamics.

Build a functional aircraft.

Discover the inner workings of electric motors.

Gain experience with hydraulic systems.

Study four stroke and two stroke engine theory.

This is a beginner's course that explores many different aspects of powered systems that are used in our daily lives. This course is a good foundation for future enrolment into the automotive department.

Automotive

TE-AUTOMOTIVE 10

Prerequisite: None

Learn to disassemble and reassemble an engine.

Strong focus on four stroke theory and systems.

Establish knowledge of basic automotive systems (brakes, cooling, etc.).

This is the beginner's course in the automotive department. Students who complete this course will be able to continue on in the shop to learn more sophisticated concepts and perform repairs on cars.

TE-AUTOMOTIVE TECHNOLOGY 11

Prerequisite: None

Learn money saving techniques.

An introduction to automotive maintenance and repair using diagnostic equipment.

Topics include: engine operation, ignition operation, minor tune up techniques, lubrication, cooling, fuel systems, electrical systems, tires, brakes, and buying a used car.

Consists of approximately 50% theory and 50% practical. Maintenance and safety are stressed.

TE-AUTOMOTIVE TECHNOLOGY 12

Prerequisite: Automotive Technology 11 with 65% or higher, or with instructor permission.

Continuation of material learned in Automotive Technology 11, including mechanical problem solving and trouble shooting.

Repair and theory to include fuel and ignition systems, suspension, steering, drive lines, and transmissions.

Students are given the opportunity to acquire the knowledge and develop the necessary skills to enable them to repair their own automobiles after graduation.

Consists of approximately 40% theory and 60% practical.

Students considering a career in automotive or related fields should take this course in conjunction with Mechanics 12 Drivetrain.

TE-AUTOMOTIVE TECHNOLOGY 12: DRIVETRAIN

Prerequisite: Automotive Technology 11. This course must be taken in conjunction with Automotive Technology 12.

Learn high-level engine diagnostic repair and diagnostic procedures.

Discover the world of aftermarket performance parts and the effects they can produce.

Get in depth knowledge of automatic and standard transmissions.

Gain experience and knowledge with hybrid and electric vehicle technology.

This is a high-level course designed for students who wish to gain a better understanding of less understood aspects of automotive technology.

Youth Train in Trades: Automotive

AUTOMOTIVE LEVEL 1 CERTIFICATE PROGRAM

YOUTH TRAIN IN TRADES SSS/UFV DUAL CREDIT PROGRAM

Prerequisite: Automotive Technology 11

- This course is run in conjunction with the UFV Trades and Tech campus.
- **Students must sign up for two blocks (12A & 12B) in first semester of grade 12.**
- **Graduation requirements should be fulfilled before semester 2. Interested students should meet with their counsellor to assist with course planning.**
- Students will be required to complete level 12A and 12B (AND Auto 11 previously) here at Sardis Secondary in the first semester, **and level C-F at UFV in the second semester of their Grade 12 year.**
- Attendance and punctuality are required; only serious students should apply. Once completed, this training provides excellent job opportunities.
- Students receive a certificate of completion from UFV and, if they pass the ITA (Industry Training Authority) exam at the end of the course, they will receive a level 1 apprenticeship credit from the ITA.
- **Speak with Mr. Goodman and/or your counselor for more information.**

Computer Assisted Drafting and Design (CADD)

Autodesk's industry standard CADD software AutoCAD, Fusion 360 and Revit are used amongst our courses teaching students directly relevant knowledge for many careers. Our lab has current technology equal to industry and post-secondary educational institutes. The SSS Drafting program has placed top of the province with past students placing first or second in B.C. since 1999 in annual Skills Canada CADD Competitions, and has sent multiple students to Nationals in recent years.

TE-INTRODUCTORY DRAFTING & DESIGN (DRAFTING 10)

Prerequisite: None

This introductory course is open to all students and is the prerequisite for Drafting 11 (Architectural focus) and Engineering 11.

It is designed to provide knowledge of the Core Competencies of the Drafting Technician programs at British Columbia colleges and technical institutions. This course will prepare students for many careers in trades, design, architecture and engineering. Within this course we use current, industry standard computer drafting software: AutoCAD, Fusion 360 and Revit to produce drawings and renderings used in technical communications.

This course is divided into three general sections: introductory drafting, focusing on tools, techniques and basic graphic design (AutoCAD), Mechanical 3D modeling (Fusion 360) and architectural drafting (Revit). Drafting 10 will help develop skills in both manual and CADD based drafting. Students have the opportunity to use our full-scale plotter for architectural drawings, our vinyl cutter and heat press for graphic design, and our 3D printer for 3D modeling. Evaluation is based on quality and quantity of completed assignments consisting of mostly practical drawings.

TE-ARCHITECTURE LEVEL 1 (DRAFTING 11)

Prerequisite: Introductory Drafting & Design (Drafting 10)

This course further develops skills learned in the introductory course during the architectural section.

During this course students will go through a design process to develop a custom home design. They will then use industry standard Autodesk Revit to create a 3D BIM Model and a full set of working drawings for this design. Drafting 11 will appeal to those interested in home building trades and architecture. Basic BC Building Code will be covered along with design strategy, construction methods, and how a building is structurally constructed.

TE-ARCHITECTURE LEVEL 2 (DRAFTING 12)

Prerequisite: Architecture Level 1 (Drafting 11)

This course will appeal to those interested in further increasing their knowledge of home building and architectural fields.

Students will continue to develop their knowledge in Autodesk Revit as they are provided with a variety of challenges and work at using the more in-depth functions of Revit. Students will have the opportunity to develop a custom home design focusing on rendering and presentation of the 3D model.

TE-MECHANICAL ENGINEERING LEVEL 1 (ENGINEERING 11)

Prerequisite: Introductory Drafting & Design (Drafting 10)

This course will appeal to those interested in going into Engineering or a large number of other Mechanical Design careers.

Students will increase their knowledge of 3D modeling in both CAD (Fusion 360) and manual drafting. Further knowledge of Fusion 360 from the Introductory course will set the sky as the limit to what can be created and produced using our 3D printers. Students will be introduced to precision measurement tools such as Micrometers and Vernier Calipers as they produce highly accurate drawings of complex parts. Students will develop knowledge and skills around mechanical advantage and forces within designs and will have the opportunity to explore an area of interest while designing and constructing a prototype of their choosing. Students will use the Engineering design process within this course to develop ideas and prototypes.

TE-MECHANICAL ENGINEERING LEVEL 2 (ENGINEERING 12)

Prerequisite: Mechanical Design & Engineering Level 1

This course will appeal to those interested in continuing to gain knowledge in Engineering and a large number of other Mechanical Design careers before applying to post-secondary courses. Students will increase their knowledge of 3D modeling and design in CAD (Fusion 360), manual drafting and practical building. Students will have access to our Tech Shops for certain aspects of this course to construct and test their designs. Students will use the Engineering design process within this course to develop ideas and prototypes.

TE-INDUSTRIAL DESIGN, ENGINEERING & CODING 12

Prerequisite: FMP 10 or Math 10 with C+ or higher

- Open to grade 11 & 12 students
- This course will appeal to those interested in Industrial Design (product design), Engineering, or CAM (Computer-Aided Manufacturing).
- Students will learn relevant, real-world skills necessary to become Designer or Engineer.
- Students will complete the design cycle on a number of projects, from conception to finished product.
- Students will sketch, draw & model in 2D and 3D.
- Students will utilize state of the art design software to design products, convert it to machine code, and use 3D printers, lasers, and CNC equipment to bring them to life.
- Students will learn how to design with, share with, and market to potential end users of their products.

TE-ROBOTICS 10

Prerequisite: none

This course is open to grade 10-12 students.

Students will be introduced to the basics of robotics using VEX as a base platform. Students will construct and code a pre-designed robot while working in teams, before using their robot to complete specific challenges on our VEX competition field. Students will have the opportunity to re-design, add on or change the basic design to achieve greater success with their robot. Students will have the opportunity to control the robots via remote and autonomously.

Metal and Welding

TE-INTRODUCTORY METAL

Prerequisite: None – this course is open to all students in grades 10-12.

A hands-on entry-level course open to and recommended for all students.

Introductory Metal completes the necessary pre-requisites of Train in Welding.

Designed to introduce students to the numerous career opportunities in the various metalworking fields.

Covers basics: machine/welding shop safety, machining, sheet metal, foundry, forge, oxy-acetylene welding & cutting.

Students develop their skills on teacher selected skill builders finally selecting and building their own personal projects.

Costs: Only for materials beyond those required to meet the learning outcomes for the course. Students will earn the Metal 10 course credit.

TE-METAL 11

Prerequisite: Intro Metal

Metal 11 is a continuation of the Intro Metal course which expands, and continues the skills learned in Intro Metal with greater emphasis on Arc welding, including GMAW and Plasma Arc Cutting and accuracy of machining.

Students are required to complete certain mandatory skill builders; however, more time is available for personal projects and skill builder modification.

Metal 11 completes the necessary pre-requisites of Train in Trades Welding.

Costs: Only for materials beyond those required to meet the learning outcomes for the course.

TE-METAL 12

Prerequisite: Metal 11

A partially self-directed metalwork manufacturing course for students interested in post-secondary or direct employment in the many metal related fields.

A greater emphasis on employability and problem-solving skills and technology required for a changing work force.

Incorporation of non-metal-related material in metal projects.

Students may concentrate on welding, metal fabrication, sheet metal, machining, or a combination of these skills.

Costs: Only for materials beyond those required for the course.

TE-MACHINING AND WELDING 12

Prerequisite: Metal 12

Primarily a self-directed course for students entering a machining, fabricating, or welding career, or post-secondary institutions for further study.

Emphasis is placed on the enhancement of skills of welding and machining.

Students will help with equipment maintenance and manufacturing in a simulated workplace environment.

Costs: Only for materials beyond those required to meet the learning outcomes for the course.

WELDING FOUNDATION CERTIFICATE PROGRAM YOUTH TRAIN IN TRADES SSS/UFV DUAL CREDIT PROGRAM

Prerequisite: Intro Metal

This is a joint venture with the University of the Fraser Valley (UFV), the Industry Training Authority (ITA), and Sardis Secondary School. This program enables students to complete the first half of the BC Foundations Welding Program Levels 1 and 2 at SSS. After the introductory courses, Intro Metal 10 or Metal 11, students will need a minimum of 4 periods of Train in Trades Welding at Sardis to complete the first 16 credits of this program. In the 2nd semester of their grade 12 year, students attend UFV to earn the last 16 credits the Foundation Welding Program. Successful completion of this program provides students with 32 credits towards their high school graduation requirements. There are a limited number of spaces at UFV, so in order to be eligible for a spot in the UFV program students must have excellent attendance and work habits in all of their courses.

*Students must complete an application and interview with the instructor.

- **Speak with Mr. Purych and/or your counsellor for more information**

TE-TRAIN IN WELDING A

Prerequisite or Corequisite: Intro Metal

Students continue their Oxy-Acetylene welding further developing their skills in the Flat, Horizontal and Vertical positions on steel sheet metal.

From O/A Welding students move into Oxy-Acetylene Braze and Braze Welding completing a Horizontal Lap, Tee, and Corner, a Flat groove weld, and finally simulating a grey cast iron crack repair with Braze Welding.

The second half of Welding A's course introduces the students to SMAW (Stick) Welding. The students use the E6010 Fast Freeze, the E7018 Low Hydrogen and the E7024 Fast Fill Rods in the #1, Flat, position on mild steel plate.

The students are expected to prepare for and go to UFV to write the P1 Module, Introduction and Program Orientation, Exam.

TE-TRAIN IN WELDING B

Prerequisite: Completion of all Practical Welds of Train in Welding A

- Students continue their Shielded Metal Arc Welding (Stick) welding, developing their abilities welding in the #2, Horizontal and #3, Vertical positions doing Fillet and Surfacing welds on mild steel plate.
- The students are expected to prepare for and go to UFV to write the P2 Module, Oxy-Fuel Gas Cutting, and P3 Oxy-Fuel Gas Welding Exams.

TE-TRAIN IN WELDING C

Prerequisite: Completion of all Practical Welds of Train in Welding B

Students complete their Shielded Metal Arc Welding (Stick) fillet welds in Welding C.

Students will complete their #4, Overhead fillet welds on plate and move to a 2F and 5F Pipe to plate weld.

From there the students will test and extend their SMAW skills, stick welding on sheet metal in the Horizontal and Vertical Down positions.

In addition to their continued use of the E6010 and E7018 rods, Train in Welding C sees the introduction of the E6013, Farmer's Rod, and the E309, Stainless to Mild Steel, welding rods.

The students are expected to prepare for and go to UFV to write the P4 Module, Shielded Metal Arc Welding I, and P5 Module, Arc Cutting and Gouging, Welding Exams.

TE-TRAIN IN WELDING D

Prerequisite: Completion of all Practical Welds of Train in Welding C

- Train in Welding D introduces:
- Air Carbon Arc Gouging to bevel plate and remove weld faults
- The oxy-acetylene cutting exam
- Gas Metal Arc Welding (MIG) Short Circuit Transfer on plate and sheet in the flat, horizontal, and vertical up and vertical down positions.
- Gas Metal Arc Welding (MIG) Spray Transfer on plate in the flat and horizontal positions
- Gas Tungsten Arc Welding (TIG) using touch and high frequency starts moving thru flat and horizontal sheet metal lap, tee, and corners.

Woodwork & Residential Construction

TE-INTRODUCTORY WOODWORK

Prerequisite: None

Open to all grade levels

This is an introductory course into the field of woodworking.

Students will gain a foundational knowledge of working with hand and powered woodworking tools to complete a number of assigned projects.

Grades will be based on quality and quantity of work accomplished, theory work, and daily work habits.

Costs: A projects fee will be assessed to cover the cost of materials that students will take home (in the form of completed projects).

TE-WOODWORK 11

Prerequisite: Introductory Woodwork

Students will expand their woodworking skills and knowledge through the construction of more complex projects and joinery.

Students will have opportunities to construct 3 or more projects and will use most of the shop equipment in the process.

Grades will be based on quality and quantity of work accomplished, theory work, and daily work habits.

Costs: A projects fee will be assessed to cover the cost of materials that students will take home (in the form of completed projects).

TE-WOODWORK 12A

Prerequisite: Woodwork 11

This intermediate level course will introduce students to cabinet-making and the production of pictorial and written plans.

Emphasis will be placed on quality and safety.

After completing a required project, students will design and construct their own project.

Grades will be based on quality and quantity of work accomplished, theory work, and daily work habits.

Costs: A projects fee will be assessed to cover the cost of materials that students will take home (in the form of completed projects).

TE-WOODWORK 12B: FURNITURE & CABINETRY

Prerequisite: Woodwork 12 & teacher approval

An advanced wood manufacturing course that builds on the skills and knowledge learned in previous Woodwork courses.

Allows students to hone their skills in cabinet and furniture design and production

Gives a good base from which a student may go into post-secondary trades.

Projects are self-directed and should be reasonably difficult, eg. dining room table, large dresser, buffet and hutch, computer desk, etc.

Graded on well-established criteria of craftsmanship.

Course work is largely self-directed, so students must be self-motivated in order to succeed.

Cost of materials is the responsibility of the student, and will vary by project.

TE-HOME RENOVATION & REPAIR 11

Prerequisite: Introductory Woodwork

- Open to Grade 10-12 students
- Anyone that is interested in being a homeowner one day will benefit from this course, as well as those interested in the home construction or repair trades.
- Students will learn about the tools, equipment, materials, and methods used in the residential renovation and repair industry.
- Students will learn basic framing, plumbing, electrical, insulation & vapour barrier, drywall, taping & mudding, painting, finish carpentry, and tiling.
- Be the Handyperson in your home!
- Grades will be based on quality and quantity of work accomplished, theory work, and daily work habits.

DISTRICT PROGRAMS

**Chilliwack
School District**
CAREER EDUCATION

Work Experience

The SD33 Work Experience program has been in operation for over 30 years and facilitates over 1000 community-based placements for students each year. We are committed to providing practical learning opportunities for our secondary school students. Work Experience is intended to prepare students for the transition from high school to the world of work or future training and education. Work Experience allows students to connect what they learn in the classroom with the skills and knowledge needed in the workplace and society.

Students will use Work Experience to explore careers, to earn credits toward graduation, and to apply for community bursaries and scholarships. Work Experience also helps young people build a strong network of community contacts and references.

Each secondary school in the Chilliwack School District has a dedicated Work Experience Facilitator on staff to connect directly with students who want to explore Work Experience opportunities in the community.

Elective Work Experience Courses (WEX12A & WEX12B)

- Available to grade 11 and 12 students
- Requires an application
- Off-timetable
- 100 hours of community-based placements
- Written assignments
- Students may utilize paid work hours for credit

* Students in Grades 10-12 do **NOT** need to be registered in a WEX12 course to receive a community-based Work Experience placement. Simply complete a *Work Experience Placement Request* form and submit to your school's Work Experience Facilitator.

**Chilliwack
School District**
CAREER EDUCATION

Trades Sampler

The *Trades Sampler* program allows students to dive deep into a variety of trades as they find their preferred career path. Thanks to this partnership between the Ministry of Education and Skilled Trades BC, students gain hands-on experience before they enrol in a high school apprenticeship program like *Youth TRAIN in Trades* or *Youth WORK in Trades*.

In partnership with U.F.V. *Trades & Technology*, students receive workplace skills training around tools & equipment, workplace safety and job readiness skills, and receive a number of industry certifications. Students complete technical modules, covering four or more specific trades, including contact with at least one employer in each trade.

Students may also have the option to complete an embedded Work Experience course, where they will receive up to 100 hours of community-based Work Experience placements in a trade of their choice.

Women in Trades Option Available

- Available at GWG (Grade 11 & 12 students)
- Targeted program for women interested in skilled trades
- Limited space available (18 students)

ALL Trades Sampler students should...

- Have a keen interest in the skilled trades
 - Be considering a career in skilled trades
 - Have a good attendance record
 - Be able to handle the rigours of a University-level program
 - Have access to reliable transportation to U.F.V.
-

SKILLEDTRADESBC
YOUTH

**Chilliwack
School District**
CAREER EDUCATION

Youth WORK in Trades

Over the last 30 years, the SD33 Trades Program has registered over 2000 apprentices with Skilled Trades BC. There are over 100 different trades to choose...from Carpenter to Hairstylist, from Cook to Welder, and many more!

Elective Youth WORK in Trades Courses (YWIT 11A, 11B, 12A, 12B)

- Available to grade 9, 10, 11 and 12 students (14 yrs. old)
- Earn up to 16 graduation credits
- Requires an application
- Off-timetable
- Must be employed in a Skilled Trades BC Apprenticeship trade
- Must be working with a qualified tradesperson
- Must be currently enrolled in Secondary School
- Students may apply for \$1000 scholarship

Get on-the-job training as a Youth Apprentice!

SKILLEDTRADESBC
YOUTH

**Chilliwack
School District**
CAREER EDUCATION

Early Childhood Education Dual-Credit

ECE training is offered to Grade-12 students with an interest in Early Childhood Education. Early Childhood Assistants and Early Childhood Educators can find work in daycares, preschools, nursery schools, special needs centres, public schools, and infant or toddler centres.

Students must be enrolled and completing English 12, and have completed English 11, Math 11, English 10 and Math 10 with C+ average to enroll in part-time studies at the *University of the Fraser Valley* in their Grade 12 year. Students must have the intention to graduate with a Dogwood diploma (B.C. Graduation Certificate).

Tuition fees are covered by the School District. Ancillary fees, books and materials are the student's responsibility. Application process is competitive and space is limited.

Fall Courses at U.F.V.

ECE 100 - Human Development 1

ECE 101 - Introduction to Early Childhood Education

Winter Courses at U.F.V.

ECE 103 - Introduction to Observing and Recording
Behaviour of Young Children

CMNS 125 - Communicating Professionally to
Academic & Workplace Audiences

**UNIVERSITY
OF THE FRASER VALLEY**

Early Childhood Education Pathway for Dual Credit

Dual Credit Entrance Requirements

- School District Application Form
- Letter of Intent
- Complete English 11 and Math 11 - with C+ or better
- Enrolled in English 12 - Must achieve C+ or better

Fall Courses at UFV

- ECE 100 - Human Development 1
- ECE 101 - Introduction to Early Childhood Education

Winter Courses at UFV

- ECE 103 - Introduction to Observing and Recording Behaviour of Young Children
- CMNS 125 - Communicating Professionally to Academic & Workplace Audiences

Pathway Summary

- 12 of the 43 credits for the full ECE Certificate pathway
- Meets the requirement for the Early Childhood Education Assistant (ECAC) certificate

Completing the ECEA Pathway

Students are eligible to apply for an *Early Childhood Education Assistant* certificate through the BC Government Early Childhood Educator Registry, after completing the Fall Semester Courses.

Laddering your Dual Credit into the ECE Program

Once your Dual Credit courses are complete, you can apply to continue your studies at the University of the Fraser Valley to complete your full Early Childhood Education Certificate.

**Chilliwack
School District**
CAREER EDUCATION

Youth TRAIN in Trades

The *Youth TRAIN in Trades* Program allows high school students to take pre-apprenticeship (technical) training that provides them with dual-credit (up to 32 credits) for high school courses and apprenticeship or industry training programs.

This is an innovative partnership between the University of the Fraser Valley (UFV) and the Chilliwack School District. Grade-11 students can apply to pursue an apprenticeship career path to obtain the first level of technical training in a particular trade in their grade-11/12 year.

Youth TRAIN in Trades Programs are tuition-free, however students are required to pay ancillary fees and materials. Application process is competitive and space is limited.

Who Attends: Students in their grade-12 year

Facilitator: School Counsellor

Dates: Grade 12 Year

Location: UFV Trades and Tech, CSS, SSS
(depending on selected program)

Fees: Ancillary fees, books, clothes and tools range from
\$1,800 - \$2,400 (depending on selected program)

PROGRAMS OFFERED AT SD33 SCHOOL SITES:

- Auto Service Technician @ Chilliwack Secondary & Sardis Secondary, in partnership with UFV
- Welding @ Sardis Secondary & Chilliwack Secondary, in partnership with UFV
- Hairdressing at Chilliwack Secondary

SKILLEDTRADESBC
YOUTH

**Chilliwack
School District**
CAREER EDUCATION

Youth TRAIN in Trades Auto Service Technician

Program Summary:

Automotive Service Technician: Semester 1 – Chilliwack or Sardis Secondary
Semester 2 – UVF Chilliwack Trades & Tech. Campus

Transportation: Students are responsible for their own transportation

Tuition: Paid by Chilliwack School District

Equipment, Textbooks & Other Fees: approximately \$1,000

Certification Received: Certification of Completion in Auto Service Tech. Foundation

Youth TRAIN in Trades Program Objectives:

Skilled Trades BC Youth TRAIN in Trades is an industry certification program for BC secondary school students. The program enables students to earn both graduation credits and credit for the first level of technical training associated with a *Skilled Trades BC* program or apprenticeship. Through Work Experience placements, students can also earn credit toward the on-the-job component of a *Skilled Trades BC* program. This is an opportunity for high school students to get a head start on earning their credentials in one of the more than 100 trades or industry occupations that are accredited or recognized by *Skilled Trades BC*.

Courses to be Taken at High School:

COURSE	CREDITS	GRADE
English Studies 12	4	Grades 11, 12 school year
TRN A	4	Grades 11, 12 school year
TRN B	4	Grades 11, 12 school year
*Students must also complete <u>ALL</u> pre-requisites for graduation prior to moving on to UVF.		

**Chilliwack
School District**
CAREER EDUCATION

Youth TRAIN in Trades Hairstylist

Program Summary:

Hairstylist: Chilliwack Secondary – Semester 2 (Grade 11), Semester 1 (Grade 12)

Transportation: Students are responsible for their own transportation to CSS

Equipment, Textbooks & Other Fees: approximately \$500 for salon tool kit

Certification Received: Skilled Trades BC Foundation Level 1

Youth TRAIN in Trades Program Objectives:

Skilled Trades BC Youth TRAIN in Trades is an industry certification program for BC secondary school students. The program enables students to earn both graduation credits and credit for the first level of technical training associated with a *Skilled Trades BC* program or apprenticeship. Through Practicum placements, students can also earn credit toward the on-the-job component of a *Skilled Trades BC* program. This is an opportunity for high school students to get a head start on earning their credentials in a trade recognized by *Skilled Trades BC*.

Topics Covered in the Hairstylist Program:

- Introduction to the Cosmetology industry
- Design Principles
- Hair Cutting & Styling
- Salon Ecology
- First Aid
- Trichology
- Personal & Public Hygiene
- Bacteriology & Infection Control
- Client Relations
- Hair Colouring & Highlighting
- Chemical Texturizing
- Anatomy & Physiology
- Wigs & Hair Extensions
- Resume Design
- Employability Skills
- Skilled Trades BC Final Exam

Youth TRAIN in Trades Professional Cook 1

Program Summary:

Professional Cook 1: Imagine High – Grade 12 (Full Year)

Transportation: Students are responsible for their own transportation to IHSS

Equipment, Textbooks & Other Fees: approx. \$850 for textbooks, supplies, uniform & knives (*subject to change*)

Certification Received: Professional Cook – Level 1

Youth TRAIN in Trades Program Objectives:

Skilled Trades BC Youth TRAIN in Trades is an industry certification program for BC secondary school students. The program enables students to earn both graduation credits and credit for the first level of technical training associated with a *Skilled Trades BC* program or apprenticeship. Through Practicum placements, students can also earn credit toward the on-the-job component of a *Skilled Trades BC* program. This is an opportunity for high school students to get a head start on earning their credentials in a trade recognized by *Skilled Trades BC*.

Prerequisites

- Must be a registered student in the Chilliwack School District
- Must be 15 years of age to begin and 19 years of age before program completion
- Completion of all Grade 11 courses
- Completion of English 12 & Indigenous Grad Requirement (*course may vary*)
- **Course Planning in advance is necessary to ensure course availability**

Modules Covered in the Professional Cook 1 Program:

(Each module contains several different topics)

- | | | |
|--------------------------|----------------|-----------------------------------|
| • Occupational Skills | • Meats | • Eggs, Breakfast Cookery & Dairy |

CAREER EDUCATION

Regional Career Programs

RCP training is offered to academically capable secondary school students with an interest in the Trades and Technology sector. The training is designed for high school students who have met their graduation requirements for grade 11 and 12 in an accelerated manner to enroll in full time studies at the University of the Fraser Valley in their Grade 12 year.

Students are required to meet the UFV entrance requirements for the program, including any necessary entrance exams. UFV courses may qualify for DUAL CREDIT, giving students additional credits towards the high school completion certificate.

Regional Career Programs are tuition-free, however students are required to pay ancillary fees and materials. Application process is competitive and space is limited.
